Introduction

Tax-benefit policy “country chapters” are made available as part of the OECD series *Benefits and Wages*. They provide detailed descriptions of tax and benefit rules in a consistent format across countries and summarize recent policy changes.

Country chapters for other countries and years are available on the Internet at www.oecd.org/els/social/workincentives.

1. Overview of the tax-benefit system

The provision of social security benefits in New Zealand is funded from general taxation and not specific social security contributions. Social security benefits for the unemployed are not funded from specific employee/employer contributions and there are no minimum working hours or earnings required in order for a person to be covered. All New Zealanders regardless of their employment history are covered by the benefits provided under the Social Security Act 1964. All benefits are payable without a fixed duration. In addition to the specific qualifying criteria for each benefit, provision is subject to a New Zealand residence requirement and personal income (joint income in the case of married, civil union and de facto couples).

Working for Families Tax Credits (Family Tax Credit, In-Work Tax Credit, Parental Tax Credit and Minimum Family Tax Credit) are available to families with dependent children. Minimum Family Tax Credit provides a guaranteed minimum family income to working non-beneficiary families¹.

The tax unit is the individual but eligibility for Working for Families Tax Credits is based on combined family income (children's income is not counted). The average annual taxable income of personal taxpayers for 2009 was NZD 34,123²

1.1. Average Worker wage (AW)

The 2010 AW level was NZD 48 007.

Unemployment insurance

In New Zealand there is no unemployment insurance.

3. Unemployment assistance

3.1 Conditions for receipt

A person is entitled to an Unemployment Benefit provided they are available and willing to undertake full time paid employment. A person must have resided in New Zealand continuously for at least two years and be at least 18 years old, or alternatively be at least 16 years old and married, in a civil union or de facto relationship, with one or more dependent children. They must not be in full time employment (defined as working 30 or more hours per week), but available for and taking reasonable steps to find suitable employment. These latter provisions are known as the "work test". A stand down period of between zero and two weeks is applied to new applicants. The length of stand down is determined by a formula which takes account of household structure and gross income in either the 6 or 12 months prior to the date of benefit entitlement, whichever results in the shorter stand down³.

Striking workers and full time students are not entitled to the Unemployment Benefit.

¹ Working for Families Tax Credits are administered as transfer payments paid through the tax and benefit systems. They were renamed as "Working for Families Tax Credits" in 2007. See section 12.2 for details.

² This data is based on a sample of individual taxpayers as at 31 March 2009. It is a progress total as returns for 2009 are still being received. It includes all those who filed a return (or received a personal tax summary) and all those from whom PAYE was deducted. It does not include non-filers unless they had PAYE-related earnings. It does include some people with losses, who hence have zero taxable income.. The reason this figure is lower than the average weekly earnings is because it includes people with part-year incomes, part-time incomes and children if they files a return.

³ This came into effect on 2 July 2007.

Reference date for all information is **July 1st 2010 unless otherwise stated.**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

3.1.1 *Employment conditions*

If an applicant (or their work tested partner) has left their job of their own free will, without a good and sufficient reason, the stand down period applied is 13 weeks from the date their employment ceased.

3.1.2 *Contribution conditions*

None.

3.2 *Calculation of benefit amount*

3.2.1 *Calculation of gross benefit*

Entitlement is based on the family, not the individual. Each partner of a married, civil union or de facto couple usually receives half of the total benefit but their benefit can be differently apportioned in some circumstances.

Unemployment Benefit rates as at 1 April 2010	
<i>Family type</i>	<i>Gross rate (NZD per four weeks)</i>
Single 18-19 at home	591.60
Single 18-19 away from home	739.48
Single 20-24	739.48
Single 25 and over	887.40
Sole parent	1291.92
Married, civil union or de facto couple (with or without children)	1478.96

3.2.1.1 *Irregular additional payments*

There are a range of payments or advances available to provide assistance in a financial crisis, including special needs grants, advance payments of benefit, recoverable assistance, or temporary additional support. The amounts available depend on individual circumstances and needs

3.2.1.2 *Obligations of family members*

Work test obligations apply to the partners of people receiving the unemployment benefit where there are no dependent children or where the youngest child is 18 years of age. Where partners have a youngest child aged 6 years or over but under 18 years part-time work test obligations apply. No work test obligations apply to partners with a youngest child under 6 years.

If the partner fails without good and sufficient reason to comply with their work test obligations, the unemployment benefit may be stopped.

Reference date for all information is **July 1st 2010 unless otherwise stated.**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

3.2.2 *Income and earnings disregards for benefit recipients and those starting a new job*

Net Unemployment Benefit payments are abated at a rate of 70 cents for each dollar after NZD 80 gross weekly earnings before tax. The unit of income assessment is personal income for single people, or joint income for married, civil union and de facto couples.

3.3 *Tax treatment of benefit and interaction with other benefits*

Unemployment Benefit is taxable with each spouse receiving half of the benefit entitlement for taxation purposes.

3.4 *Benefit duration and waiting periods*

Unemployment Benefit is payable indefinitely.

3.5 *Treatment of particular groups*

3.5.1 *Young persons*

There is no unemployment assistance for people under 18 years old, unless they are 16 or 17 years old and married, in a civil union or de facto relationship with one or more dependent children. Unemployed 16 and 17 year olds who have lost the support of their parents may be entitled to an Independent Youth Benefit.

3.5.2 *Older workers*

Universal Superannuation is payable from age 65. There is no compulsory retirement age.

3.5.3 *Others if applicable*

There are a range of work test exemptions that can be applied. For example a client (or partner) serving a sentence of home detention can be exempted from the work test for this period.

Pregnant jobseekers may be exempt from their work test obligations from the day they provide proof of pregnancy from a health professional. Once the jobseeker is 27 weeks pregnant they can be transferred to the non-work tested Sickness Benefit.

A person who is sick, injured or disabled may be eligible to receive an Invalid's Benefit or a Sickness Benefit. These benefits are not work tested but partners may be subject to a work test depending on their circumstances.

Unemployed sole parents and caregivers may be entitled to a Domestic Purposes Benefit (see section 9).

4. Social assistance

None.

5. Housing benefits for rented accommodation

5.1 *Conditions for receipt*

Accommodation Supplement provides assistance towards accommodation costs, including private rent, board and home ownership costs. A person does not have to be receiving a benefit to qualify for Accommodation Supplement.

5.2 *Calculation of benefit amount*

The calculation of the Accommodation Supplement is based on actual accommodation costs.

5.2.1 *Calculation of gross benefit*

Accommodation Supplement provides for 70 per cent of accommodation costs above the entry threshold, up to a maximum amount.

- The entry threshold is 25 per cent of a person's net rate of benefit (30 per cent if they own their own home) plus the first child rate of Family Tax Credit for people with children.
- For non-beneficiaries, the entry threshold is 25 per cent of the relevant Unemployment Benefit (30 per cent if they own their own home) plus the first child rate of Family Tax Credit for people with children.

Accommodation Supplement payments are capped according to median rents in different parts of the country. For example a greater maximum amount of Accommodation Supplement is available in Auckland, reflecting the higher accommodation costs in that city.

Accommodation Supplement weekly maxima as at 1 April 2010 (NZD)				
<i>Family type</i>	<i>Area 1</i>	<i>Area 2</i>	<i>Area 3</i>	<i>Area 4</i>
1 person	145	100	65	45
2 people	160	125	75	55
3 or more people	225	165	120	75

*Note there was no change to the weekly maxima between 2009/10

5.2.2 *Income and earnings disregards*

Beneficiaries do not have their Accommodation Supplement abated. Non-beneficiaries have their Accommodation Supplement reduced by 25 cents for each dollar of gross income above the relevant income threshold shown below.

Accommodation Supplement income thresholds for non-beneficiaries as at 1 April 2010	
<i>Family Type</i>	<i>NZD per four weeks</i>
Single 16-17 years	1432
Single 18 years and over	1432
Married, civil union or de facto couple	2172
Sole parent	1912

Reference date for all information is **July 1st 2010 unless otherwise stated.**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

A cash assets test is also applied. Single beneficiaries without dependent children cannot receive an Accommodation Supplement if they have assets exceeding NZD 8 100. The asset limit for beneficiary couples and beneficiaries with dependent children is NZD 16 200.

Single non-beneficiaries have every NZD 100 of their cash assets over NZD 2 700 treated as NZD 1 per week income for Accommodation Supplement abatement purposes. Non-beneficiary couples and non-beneficiaries with dependent children have every NZD 100 of their cash assets over NZD 5 400 treated as NZD 1 per week income for abatement purposes.

* Note: there has been no change to the cash asset test for AS.

5.2.3 Costs eligible for housing benefits

Rent, board and home ownership costs are all eligible costs for housing benefits. Home ownership costs can include mortgage payments, rates including water rates, home and mortgage protection insurance and essential repairs and maintenance.

5.3 Tax treatment of benefit and interaction with other benefits

Not taxable.

5.4 Treatment of particular groups

Tenants who live in a state house receive an Income Related Rent subsidy, and are not eligible for an Accommodation Supplement. People receiving an Income Related Rent subsidy pay 25 per cent of their net income in rent.

5.4.1 Young persons

Young people aged 16-17 years are not eligible to receive an Accommodation Supplement unless they are financially independent.

5.4.2 Older workers

People receiving New Zealand Superannuation or Veterans Pension cannot receive an Accommodation Supplement if they have other income exceeding the appropriate income limit.

5.4.3 Others if applicable

Generally students studying full-time cannot access Accommodation Supplement but may receive an Accommodation Benefit if they qualify for a Student Allowance.

6. Family benefits

6.1 Conditions for receipt

Family Tax Credit is available to families with dependent children.

- Beneficiary families are paid Family Tax Credit weekly or fortnightly with their benefit.

Reference date for all information is **July 1st 2010 unless otherwise stated.**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

- Family Tax Credit is paid to non-beneficiary families by the Inland Revenue Department, either weekly or fortnightly, (with an end of year “square up”) or in one lump sum at the end of the tax year.

Non-beneficiary families may also be entitled to other Working for Families Tax Credits (see section 10.1.1.2 below).

6.2 Calculation of benefit amount

Family Tax Credit rates depend on the number of children, the age of the children and family income.

6.2.1 Calculation of gross benefit

Gross Family Tax Credit rates as at 1 April 2010 (NZD per four weeks)	
<i>Family Type</i>	<i>NZD per four weeks</i>
First or only child aged 0-15 years	345.16
First or only child aged 16-18 years	399.84
Second or subsequent child aged 0-12 years	239.92
Second or subsequent child aged 13-15 years	273.60
Second or subsequent child aged 16-18 years	357.76

* Note: Gross Family Tax Credit rates did not alter between April 2009 and April 2010.

6.2.1.1 Irregular additional payments

Nil.

6.2.2 Income and earnings disregards

Each dollar of gross income in excess of NZD 36,827 reduces Family Tax Credit by 20 cents.

6.3 Tax treatment of benefit and interaction with other benefits

Not taxable.

6.4 Treatment of particular groups

None.

6.4.1 Young persons

None.

6.4.2 *Older workers*

None.

6.4.3 *Others if applicable*

None.

7. **Childcare for pre-school children**

As at 1 July 2009 there were 180,910 enrolments in licensed early childhood education services, with 12,047 of these in the 3-4 years age group.⁴

Schooling is compulsory by age six in New Zealand, although the majority of children start school immediately after their fifth birthday (only 1,681 five year olds were enrolled in licensed early childhood services as at 1 July 2009).

From 1 July 2007 three and four year old children attending a teacher-led early childhood service became entitled to access up to 20 hours of free childcare per week. This funding was intended to cover the average cost of meeting the regulated requirements for ECE provision. Some providers may choose to offer additional features above and beyond the regulations. Parents may be requested to pay an additional charge if they wish to purchase these additional features. Free ECE funding is paid directly to ECE providers who have opted into the scheme.

7.1 ***Out-of-pocket childcare fees paid by parents***

Government provides universal funding of between NZD 3.22 and NZD 13.06⁵ per hour per child to assist with early childhood education fees. The payment is made by the Ministry of Education direct to the provider of the service and varies according to the age of the child (under 2 or over 2) and the type of service.

Childcare Tax Credit is available for some working parents, who can claim a maximum tax credit of NZD 310 per year. The maximum rebate is available to families who paid NZD 940 or more for childcare.

7.2 ***Child-care benefits***

7.2.1 *Conditions for receipt*

Childcare Subsidy is a non-taxable payment which assists low- and middle-income families to pay for their under five year old children (and some under six year olds) to attend licensed preschool facilities.

A person may be entitled to a Childcare Subsidy of up to 9 hours per week if they meet the income test. People who are in work related activities or undertaking training may access up to 50 hours Childcare Subsidy per week for the time they are engaged in those activities. The payment is made to the provider of the service on behalf of the parent.

7.2.2 *Calculation of benefit amount*

7.2.2.1 *Calculation of gross benefit*

⁴ Source: July 2009 annual census of children and staff at licensed and/or chartered early childhood education (ECE) services and license-exempt playgroups, conducted by the Ministry of Education. The figures for 2010 are not available until late 2010 or early 2011.

⁵ As announced in Budget 2010.

Reference date for all information is **July 1st 2010 unless otherwise stated.**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

The following table shows Childcare Subsidy income abatement thresholds and maximum rates from 1 April 2010.

Childcare Subsidy income abatement thresholds and rates as at 1 April 2010 (NZD)		
<i>Number of children</i>	<i>Gross weekly income</i>	<i>Childcare Subsidy (per hour)</i>
1	Less than 1,274	3.70
	Less than 1,380	2.57
	Less than 1,486	1.43
	1 4086 or more	nil
2	Less than 1, 465	3.70
	Less than 1,581	2.57
	Less than 1,698	1.43
	1, 698 or more	nil
3 or more	Less than 1,634	3.70
	Less than 1,772	2.57
	Less than 1,1910	1.43
	1 ,1910 or more	nil

*Note: there was no change to the subsidy between 2009 and 2010.

7.2.2.2 Income and earnings disregards

Benefits are reduced according to gross income (see section 7.2.2.1).

7.2.3 Tax treatment of benefit and interaction with other benefits

Not taxable.

7.2.4 Treatment of particular groups

None.

8. Employment-conditional benefits

In-Work Tax Credit, Minimum Family Tax Credit and Parental Tax Credit are available only to non-beneficiary families. In-Work Tax Credit and Minimum Family Tax Credit require the parent (or at least one parent in the case of couples) to meet an hours of work test (see section 10).

9. Lone-parent benefits

9.1 Conditions for receipt

Sole parents 18 years or older may qualify for Domestic Purposes Benefit if they are the primary carer for a qualifying dependent child.

There is no work test for the Domestic Purposes Benefit. Instead, Domestic Purposes Benefit recipients participate in a planning process that promotes goal setting for the time when their circumstances allow them to successfully combine parenting and work. While most sole parent beneficiaries receive a Domestic Purposes Benefit, other benefits (Unemployment, Sickness and Invalid's) can also be paid at a sole parent rate.

9.2 Calculation of benefit amount

9.2.1 Calculation of gross benefit

As at 1 April 2010 the weekly gross rate of the sole parent Domestic Purposes Benefit was NZD 322.98.

9.2.1.1 Irregular additional payments

As mentioned in 3.2.1.1 there are a range of payments or advances available to provide assistance in a financial crisis, including special needs grants, advance payments of benefit, recoverable assistance, or temporary additional support. The amounts available depend on individual circumstances and needs.

9.2.2 Income and earnings disregards

The net rate of Domestic Purposes Benefit is abated by 30 cents for each dollar of weekly earnings between NZD 80 and NZD 180. Earnings above NZD 180 per week abate the benefit by 70 cents for each dollar earned. The default is an annual income assessment, though the beneficiary may choose to have a weekly assessment.

9.3 Tax treatment of benefit and interaction with other benefits

The Domestic Purposes Benefit is taxable.

9.4 Benefit duration

Sole parents lose eligibility for Domestic Purposes Benefit when their youngest dependent child turns 18 or at the end of the secondary school year in which their youngest child turned 18.

9.5 Treatment of particular groups

9.5.1 Young persons

Some 16 and 17 year old sole parents may be eligible for Emergency Maintenance Allowance.

Reference date for all information is **July 1st 2010 unless otherwise stated.**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

9.5.2 *Older workers*

None.

9.5.3 *Others if applicable*

None.

10. Tax system

10.1 Income tax

10.1.1 *Tax allowances and credits*

10.1.1.1 Standard allowances

None.

10.1.1.2 Standard tax credits

Tax credit for income under \$9 880

A tax credit is available to persons with income under NZD 9 880. This credit is limited to those in full-time employment or who would have been in full-time employment but for sickness or accident. The rebate is NZD 728, reduced by 20 cents on each dollar earned over NZD 6 240 – thus the rebate runs out at NZD 9 880. The tax credit is not available if the taxpayer receives an income tested benefit or if any of the universal cash transfers apply. In addition, the amount of the rebate depends on the proportion of weeks in the year where 20 hours or more have been worked.

Family Tax Credit

See section 6.

In-Work Tax Credit

In-Work Tax Credit is available to non-beneficiary families who normally work a minimum number of hours each week.

- A sole parent qualifies if they work at least 20 hours per week.
- A two-parent family qualifies if the two parents work a combined 30 hours per week.

In-Work Tax Credit is up to NZD 60 week per for families with three children or fewer, increasing by NZD 15 for each additional child after the third. Eligibility for In-Work Tax Credit also depends on family income.

Families receiving the following government transfers can still qualify for In-Work Tax Credit, provided the family works the required hours:

- NZ Superannuation
- Veteran's pension
- a foster, orphan's or unsupported child's benefit
- accident compensation for incapacity provided the person normally worked the required hours each week prior to their injury and had an accident after 1 January 2006

Reference date for all information is **July 1st 2010 unless otherwise stated.**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

- paid parental leave or Parental Tax Credit provided the family worked the required hours before taking leave due to the birth of a child.

Minimum Family Tax Credit

Minimum Family Tax Credit is available to working non-beneficiary families.

- A sole parent qualifies if they work at least 20 hours per week.
- A two-parent family qualifies if the two parents work a combined 30 hours per week.
- Self-employed people are not eligible.

The Minimum Family Tax Credit was increased in April 2010. It ensures a minimum net income of NZD 400 per week (including ACC deduction, NZD 20,800 per annum) before Family Tax Credit and In-Work Tax Credit are included.

Parental Tax Credit

Families may be entitled to a Parental Tax Credit of NZD 150 per week for the first eight weeks after they have a new baby. They cannot receive a Parental Tax Credit if they are receiving Paid Parental Leave.

10.1.2 Income tax schedule (central government income tax)

NZ income tax schedule	
<i>Gross taxable income as at 1 April 2010 (NZD per year)</i>	<i>Statutory tax rate (%)</i>
0 – 14,000	11.5
14,001 – 48,000	19.25
48,001 – 70,000	31.5
over 70,000	35.5

10.1.3 State and local income taxes

New Zealand has no state or local income tax.

10.2 Treatment of family income

Family members are taxed as individuals.

10.3 Social security contributions and payroll taxes

New Zealand has no compulsory social security contributions to schemes operated within the government sector.

It should be noted that there is an accident compensation scheme administered by the Accident Compensation Corporation for residents and temporary visitors to New Zealand. This scheme is funded in part by premiums paid by employees and employers. Employees pay a premium of 2% of their gross earnings. Employers pay a premium depending on their total payroll and their assessed accident risk (the average rate is 1.06%).

Reference date for all information is **July 1st 2010 unless otherwise stated.**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

10.4 Treatment of particular groups

10.4.1 Young persons

Children who are under the age of 15, or under the age of 18 and attending primary or secondary school, or who turned 18 in the preceding income year and are still at school, are eligible to receive a Child Tax Rebate. Eligible children are allowed to earn income (less interest and dividends) up to NZD 2 340 per annum, tax-free.

10.4.2 Older workers

None.

10.4.3 Others if applicable

None.

11. Part-time work

11.1 Special benefit rules for part-time work

People must be working less than an average of 30 hours per week to be eligible for Unemployment Benefit.

11.2 Special tax and social security contribution rules for part-time work

None.

12. Policy developments

12.1 Policy changes introduced: 2nd July 2009 – 1st July 2010

12.1.1 Changes to Goods and Services tax

GST is a tax on most goods and services in New Zealand, most imported goods and certain imported services. GST is added to the price of taxable goods and services at a rate of 12.5%. From 1 October 2010 Goods and Services Tax (GST) increases from 12.5% to 15%. We expect this to mean that prices will rise by 2.02% (which is why some benefit rates are increasing by 2.02% refer section 12.1.4).

12.1.2 Changes to income tax rates from 1 October 2010:

NZ income tax schedule	
<i>Gross taxable income as at 1 October 2009 (NZD per year)</i>	<i>Statutory tax rate (%)</i>
0 to 14,000	10.5
14,001 to 48,000	17.5
48,001 to 70 000	30
over 70 000	33

Reference date for all information is **July 1st 2010 unless otherwise stated.**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

*Note: benefit payments are taxed before payment to recipients therefore people receiving a benefit do not benefit from the income tax reductions that will compensate other earners for GST cost increases.

12.1.3 Changes to Working for Families tax rates from 1 October 2010:

Weekly rate	Rates from 1 October 2010 NZD
First child if under 16	88.04
First child if 16 or over	101.98
Subsequent child rate if under 13	61.19
Subsequent child rate if 13 to 15	69.79
Subsequent child rate if 16 or over	91.25
Income threshold	36 827

The threshold for the minimum family tax credit increases from \$20,800 to \$21,216 (after tax).

12.1.4 Other changes to compensate for GST increases

To compensate for increases in costs as a result of the GST increase from 1 October:

- A Temporary GST Assistance programme provides a temporary payment of 2.02 percent of the after tax weekly base rate of benefits to recipients of main benefits, Student Allowance and New Zealand Superannuation and Veteran's Pension
- Rates of Disability Allowance, Child Disability Allowance, Childcare Assistance and Foster Care Allowance board rates increase by 2.02 percent
- The Family Tax Credit and Minimum Family Tax Credit increase by 2.02%.

12.15 e Future Focus package

The Future Focus package which takes effect in September 2010 places a strong focus on work for those on benefit. It is a mixture of increased obligations and improved incentives, sending a strong message that those who can work, should work. The package:

- introduces a part-time work test for sole parents on Domestic Purposes Benefit once their youngest child turns six
- introduces a new loan to help sole parents complete tertiary study
- requires people on Unemployment Benefit to reapply every 12 months and undertake a comprehensive work assessment

Reference date for all information is **July 1st 2010 unless otherwise stated.**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

- removes the need for obligations to be negotiated and ensures that obligations are work focussed where appropriate
- introduces a new eight week medical certificate and 12 month review for people on Sickness Benefit
- changes the reduction on benefit payment for a first failure to meet work obligations from 100% to 50%
- allows people on Domestic Purposes, Widow's and Invalid's Benefits to earn NZD100 (gross) a week before their benefit starts to abate on account of income and reduces it by 30c in the dollar for every dollar of income earned between NZD100 and NZD200 a week (current levels are NZD80 and NZD180).
- increases the abatement threshold for people receiving the non-qualified spouse or partner rates of New Zealand Superannuation or Veteran's pension from NZD80 to NZD100 gross per week.
- provides for the consumers price index annual adjustment of benefit rates to be provided for in legislation
- amends the thresholds for childcare assistance
- introduces a requirement for people who have multiple grants of hardship assistance to undertake a budgeting activity.

12.1.5 Changes to early childhood education and childcare subsidy rates

From July 2010 the 20 hours ECE was extended to five year olds and those attending Playcentres and Kohanga reo (Māori language early childhood centres).

Changes to Childcare Subsidy income abatement thresholds and rates as at 1 October 2010:

Childcare Subsidy income abatement thresholds and rates as at 1 October 2010 (NZD)		
<i>Number of children</i>	<i>Gross weekly income</i>	<i>Childcare Subsidy (per hour)</i>
1	Less than 1,274	3.77
	Less than 1,380	2.62
	Less than 1,486	1.46
	1 4086 or more	nil
2	Less than 1, 465	3.77
	Less than 1,581	2.62
	Less than 1,698	1.46
	1, 698 or more	nil
3 or more	Less than 1,634	3.77
	Less than 1,772	2.62

Reference date for all information is **July 1st 2010 unless otherwise stated.**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

	Less than 1,1910	1.46
	1 ,1910 or more	nil

12.2 ***Future policy changes announced since 1st July 2009***

ANNEX

DEFINITION OF SOCIAL SECURITY CONTRIBUTIONS AND PAYROLL TAXES.

The following text has been adapted from Annex A of the OECD Revenue Statistics.

Social security contributions to general government

Classified here are all compulsory payments that confer an entitlement to receive a (contingent) future social benefit. Such payments are usually earmarked to finance social benefits and are often paid to institutions of general government that provide such benefits. However, such earmarking is not part of the definition of social security contributions and is not required for a tax to be classified here. However, conferment of an entitlement is required for a tax to be classified under this heading. So, levies on income or payroll that are earmarked for social security funds but do not confer an entitlement to benefit are excluded from this heading and shown under personal income taxes or taxes on payroll and workforce. Taxes on other bases, such as goods and services, which are earmarked for social security benefits are not shown here [...] because they generally confer no entitlement to social security benefits.

Contributions for the following types of social security benefits would, inter alia, be included: unemployment insurance benefits and supplements, accident, injury and sickness benefits, old-age, disability and survivors' pensions, family allowances, reimbursements for medical and hospital expenses or provision of hospital or medical services. Contributions may be levied on both employees and employers.

Social security contributions paid to institutions outside general government

Contributions to social insurance schemes which are not institutions of general government and to other types of insurance schemes, provident funds, pension funds, friendly societies or other saving schemes [are included here if they are compulsory or quasi-compulsory (e.g., by virtue of agreement with professional and union organisations)]. Provident funds are arrangements under which the contributions of each employee and of the corresponding employer on his/her behalf are kept in a separate account earning interest and withdrawable under specific circumstances. Pension funds are separately organised schemes negotiated between employees and employers and carry provisions for different contributions and benefits, sometimes more directly tied to salary levels and length of service than under social security schemes.

Payroll taxes

This heading covers taxes paid by employers or employees either as a proportion of payroll or as a fixed amount per person, and which do not confer entitlement to social benefits. Examples of taxes classified here are the United Kingdom national insurance surcharge (introduced in 1977), the Swedish payroll tax (1969-1979), and the Austrian Contribution to the Family Burden Equalisation Fund and Community Tax.
