

PORTUGAL 2010

1. Overview of the tax-benefit system

Portugal has an insurance-based unemployment benefit system with duration related to age and contributory career. An unemployment assistance system exists and is related to the employment history and economic resources of the recipient. Childcare benefits are made to the provider of childcare and not to the parents or children that attend it. There are no provisions for lone parents, though positive discrimination exists in a comprehensive set of measures. The tax unit is the family.

1.1. Average Worker wage (AW)

The national currency is the euro (EUR). In 2010, the Secretariat has estimated the average worker earned EUR 17 351.95.

2. Unemployment insurance

2.1 Conditions for receipt

Unemployment insurance (UI) is compulsory, except for the self-employed (non-applicable with the exception mentioned below). Claimants must be in a situation of involuntary unemployment, have to be capable and available for employment and have to be registered at the employment office.

Unemployment is regarded as involuntary whenever the end of the work contract is due to:

- Unilateral decision by the employer;
- Work contract expiration not determined by pension;
- Contract rescission by the employee with just cause (as long as the employer places no arguments against or placing them the employee proves to have set a legal action against the employer);
- Mutual agreement between employer and employee in the case of companies in situations, such as process of structural re-adaptation or recovery or any other situation that allow for collective dismissal of employees.

Invalidity pensioners that are considered as apt to work as a result of a re-assessment of their incapability are also regarded as involuntary unemployed individuals.

2.1.1 *Employment conditions*

Employment condition for UI eligibility is 450 days of employment record in the last 24 months before unemployment. Eligibility is dependent on the involuntary of the unemployment status. During 2010, as a transitional measure, employment condition for UI eligibility changed from 450 to 365 days of employment record in the last 24 months before unemployment. The goal is to enlarge the number of entitled workers. Due to financial pressures, this measure ended on the 1st of July.

2.1.2 *Contribution conditions*

The contribution condition coincides with the employment condition.

2.2 *Calculation of benefit amount*

2.2.1 *Calculation of gross benefit*

The benefit amounts to 65 per cent of the average salary during the 12 months period ending 2 months before unemployment. This calculation takes into account the annual vacation bonus and the Christmas bonus due in the reference period. The maximum benefit amount is the minor value between three times the IAS (Indexante dos Apoios Sociais – Social Support Index) or 75% of net reference remuneration; the minimum amount is the amount of the IAS or of the average remuneration (also referred to as reference remuneration), whichever is lower. The IAS amount in 2010 was EUR 419.22 per month. The unemployment benefit is paid on a monthly basis.

2.2.2 *Income and earnings disregards for benefit recipients and those starting a new job*

The unemployment insurance benefit may be accumulated with part-time work or self-employment if the earnings from work are inferior to the UI amount. In these situations the UI benefit is equal to the difference between 1.35 times the unemployment benefit and the value of part-time work or self-employment earnings. UI cannot be accumulated with pensions of any kind.

2.3 *Tax treatment of benefit and interaction with other benefits*

Not taxable.

During the period of subsidized unemployment (UI) a full-time working social contribution equivalent is registered for pension entitlement and accrual purpose. This means that during subsidized unemployment, individuals do not interrupt their contributory career and the reference earnings are registered as if actual wages were being received.

Unemployment insurance benefit is suspended whenever there is recognition of entitlement to the following benefits: benefit for medical risk during pregnancy; benefit for pregnancy interruption; initial parental benefit; initial parental benefit exclusive of the father; initial parental benefit exclusive of the mother; initial parental benefit assigned to a parent in case of the other parent impossibility; adoption benefit.

Those entitled to partial unemployment insurance benefit who are not covered by the benefits exposed above but are incapable to work due to sickness, childbirth or adoption have the right to receive the unemployment insurance benefit during the period of incapacity or impossibility to work.

2.4 *Benefit duration and waiting periods*

There is no waiting period. Duration increases with age and contributory record after the last subsidized unemployment spell according to the following table:

Age	Contributory career	Duration (days)	Extended duration
<30	≤24 months	270	-
	>24 months	360	30 days for each group of 5 years of contributory record
30 – 39	≤48 months	360	-
	>48 months	540	30 days for each group of 5 years of contributory record in the last 20 years
40 – 44	≤60 months	540	-
	>60 months	720	30 days for each group of 5 years of contributory record in the last 20 years
45+	≤72 months	720	-
	>72 months	900	60 days for each group of 5 years of contributory record in the last 20 years

If the individual doesn't use the extended duration that he/she is entitled to because he resumes work previously, the contributory career that wasn't used may be taken into consideration for the extended duration in the next unemployment spell.

There is no special condition for re-applying for UI, as eligibility is regained only by fulfilling a new period of 450 days of work with registered social contributions.

2.5 *Treatment of particular groups*

2.5.1 *Young persons*

In the situation of offering an open-ended contract to workers in search of the first job there is a temporary exemption concerning the employers' contribution to social security. This exemption has a maximum duration of 36 months.

2.5.2 *Older workers*

As presented in point 2.4, the UI duration increases with age.

Older workers on long-term unemployment have special conditions to access Old Age Pension. After exhausting the UI or the IUSA (see point 3):

- ♦ a 57 year old or older unemployed can apply for early retirement if he/she was 52 years old or more when became unemployed and he/she had at least 22 years of registered earnings when entered unemployment. In these cases the statutory pension amount is reduced by a factor of 0,5% by each month of anticipation until the age of 62.
- ♦ Early retirement is also possible if the long-term unemployed is aged 62 or older, was aged 57 or older when he/she became unemployed and has at least 15 years of registered earnings.

If unemployment is due to contract rescission by mutual agreement, the anticipated old-age pension has an additional reduction $[(1-(n * 3\%))$, in which n is the number of years of anticipation between 62 and 65 years old] which is revoked when the pensioner reaches the age of 65.

2.5.3 *Others if applicable*

Parent workers with resident dependent children

Exceptionally, since the 1st May 2010, unemployed with dependent children are entitled to an increase of 10% in the amount of UI:

- a) If both members of a couple with dependent children receive unemployment insurance
- b) If lone parent receive employment insurance and there's no right to alimony legally set by the Court.

Due to fiscal consolidation needs, this measure was suspended in the 1st July.

Long-term unemployed

In the situation of offering an open-ended contract to long-term unemployed there is a temporary exemption concerning the employers' contribution to social security. This exemption has a maximum duration of 36 months.

3. Unemployment assistance

The Unemployment Social Allowance (USA) is flat-amount benefit aimed at protecting the unemployed individuals in two situations. Firstly, recently unemployed persons that do not fulfil the eligibility condition necessary to access UI may be entitled to the Initial Unemployment Social Allowance (IUSA). Secondly, unemployed individuals that exhausted the maximum duration of UI may be entitled to the Subsequent Unemployment Social Allowance (SUSA).

USA duration is related to age of the claimant (see 3.4).

3.1 Conditions for receipt

For receiving the initial Unemployment Social Allowance (USA), claimants have to be between 18 and 65 years of age and have to be registered unemployed looking for work and available for work. Additionally, the Unemployment Social Allowance may be renewed until the age of pensionable age anticipation is reached, provided that: *i)* when unemployment begins the insured person is aged 52 or over; *ii)* by the time of its renewal the insured person continues to meet the qualifying conditions for the Unemployment Social Allowance.

The USA entitlement is a means-tested benefit, as the monthly income *per capita* of the claimant's household cannot exceed 110% of IAS in the first semester and 80% in the second semester of 2010. This accrual of 30 percentage points was introduced as a temporary support to disadvantaged unemployed and has been in force between 1 of July of 2009 and 1 of July 2010. See 12.1 for the new Means-test procedures in force since September 2010.

The USA entitlement is dependent on the continuous involuntary nature of unemployment status. The job-search conditions for becoming and remaining entitled to the USA are similar to the ones applied to the UI (see 2.1 and 12.1).

3.1.1 Employment conditions

The employment conditions for entitlement to USA are: to have had an employment with work contract, to have become unemployed unwillingly and to be registered at the Local Employment Centre. In addition, this benefit is means tested, which means that the beneficiary must prove that the household earns less than 110/80 percent of IAS per capita (see previous point).

Additionally, the claimant cannot have any dependent work and cannot earn monthly more than 50% IAS from self-employment.

3.1.2 Contribution conditions

The claimant must have worked as an employee with registered social contributions for 180 days in the year previous to unemployment.

3.2 Calculation of benefit amount

3.2.1 Calculation of gross benefit

Benefit amounts per month are linked to the IAS and depend on family type:

Family type	In % of IAS
-------------	-------------

	After UI benefit	Not eligible for UI
Single	80	80
With an aggregate	100	100

For the temporarily extension on USA duration (see 3.4) the daily amount equals 1/30 of 60% of IAS. This daily amount is accrued by 1/30 of 10% of IAS for each child in the household and the daily global amount cannot exceed 1/30 of IAS.

3.2.1.1 *Irregular additional payments* **[NEW ITEM]**

3.2.1.2 *Obligations of family members* **[NEW ITEM]**

3.2.2 *Income and earnings disregards for benefit recipients and those starting a new job*

The claimant cannot have earning from work and/or pensions.

3.3 *Tax treatment of benefit and interaction with other benefits*

Not taxable. For pension entitlements, the reference earnings are registered as if actual wages in the case of Initial USA while the previous amount of UI is registered in the case of Subsequent USA.

3.4 *Benefit duration and waiting periods*

Regarding the beneficiaries of the initial Unemployment Social Allowance the duration is identical to point 2.4. Concerning the sequential Unemployment Social Allowance the duration is reduced to half the duration indicated in point 2.4. As to Unemployment Social Allowance to be paid subsequently its duration may be extended until the age of anticipated pension is reached (as stated under 3.1 above).

A temporarily extension of 6 months for USA duration was introduced for all Unemployment Social Allowance ending during 2009 and, after that, government has decided to prolong the temporarily extension of 6 months for USA also during 2010. The fiscal consolidation package terminated this temporarily extension in the second semester of 2010.

3.5 *Treatment of particular groups*

3.5.1 *Young persons*

Similar to point 2.5.1

3.5.2 *Older workers*

Similar to point 2.5.2 – The Unemployment Social Allowance duration can be extended until the retirement age if the beneficiaries are at least 52 years old at the moment of unemployment and fulfill, at the time of the extension, all the conditions necessary to receive this benefit.

3.5.3 *Others if applicable*

Parent workers with resident dependent children

Long term unemployed are entitled to an increase of 10% in the amount of UI for each child living in the household. This measure was in force from May to December 2010.

4. **Social assistance**

The Social Insertion Income (formerly Minimum Guaranteed Income) is focused to support individuals or families in situations of great economic need. The Social Insertion Income (SII) is both a benefit, part of the Social Welfare sub-system of the Public Social Security System, and an insertion programme, with an aim to provide individuals and their households with the means tailored to satisfy their basic needs and allow for a progressive insertion in the labour market, the community and society.

4.1 **Conditions for receipt**

For entitlement it is required legal residency in Portugal, the subscription and fulfilment of the Insertion Programme established, to provide evidence for the situation of great economic need and to have at least 18 years of age. There are exceptions to the age condition: if there are dependant minors or in case the entitled individual is pregnant.

Great economic need is recognized in the following situations:

- Individuals whose income is inferior to 100% of the social pension, which was EUR 189,52 per month in 2010 (a).
- Households whose income is inferior to the sum of the following amounts:
 - a) 100% of the welfare pension for each of the first two adults;
 - b) 70% of the welfare pension for each adult starting from the 3rd;
 - c) 50% of the welfare pension for each of the first two minors;
 - d) 60% of the welfare pension for each minor starting from the 3rd;
 - e) In case the entitled individual (if it is a woman), his spouse or person living in *de facto* union with him is pregnant, the amount stated in a) is increased by 30% during pregnancy and by 50% during the child's first year of life.
- The claimant and household members, at the time he submits the application, cannot own assets (Bank accounts, shares, investment funds, etc.) worth more than €100.612,80 (it corresponds to 240 times the value of the IAS);

For SII purposes the calculation of the household income results from the sum of all the income sources (gross income) in the month previous to the requirement (or the average of the 3 months previous to the requirement in case of independent workers or workers with variable wages), excluding the housing

subsidy, family benefits and scholarships. In addition only 80% of labour income after deduction of the contributions to social security is considered to that purpose.

Beginning on the 1st of August the SII has a new equivalence scale for means-test purposes: 100% - 1 adult, 70% - other adults and 50% - children). Also on this date a more comprehensive definition of household composition and reference income was implemented. Accordingly the following income is taken into account:

- ✓ gross income from work earnings (as employees and/or as self-employed)
- ✓ gross income from capital
- ✓ gross income from property
- ✓ income from pensions
- ✓ income from social benefits
- ✓ regular housing benefits
- ✓ scholarships and training grants

The value of the IAS will change each year according to a set of pre-established rules (for example: the IAS will increase in line with the consumer price index if real GDP growth is less than 2%, or higher than consumer price index if GDP growth is equal or higher than 2%). However this rule was not applied exceptionally in 2010.

Starting in August 2010, if an individual becomes voluntarily unemployed, he/she can only claim the Social Insertion Income entitlement after one year of unemployment.

4.2 Calculation of benefit amount

4.2.1 Calculation of gross benefit

The amount of the benefit equals the difference between the individuals/household income and the amount of the SII, calculated according the rules above described. The amount of the benefit must never be inferior to 5% of the welfare pension.

4.2.1.1 Irregular additional payments

4.2.1.2 Obligations of family members

The Insertion Programme must be established no later than 60 days after granting the benefit of social integration income (SII). SII payment ends if individuals do not accomplish the insertion program.

If an adult household member other than the entitled person does not comply with the labour insertion program (or insertion programme), that person will be excluded from the household composition for the purpose of determining the “household adult equivalent dimension”, but all income or earnings received by that family member will still be considered for the means test.

If the entitled person or beneficiary of the SII refuses, without a valid justification, the actions or measures of the insertion programme such as the offer of convenient work, socially necessary work or professional formation will determine the end of the benefit for that person.

When addressing family situation for eligibility for Social Insertion Income there are some situations where an inactive situation of an adult member may not be considered as non-compliance with job-search obligations, namely due to health issues or family responsibilities (assistance to a third family member with special needs), both certified by a medical authority. So, on the one hand, if in an initial situation the inactive status of a second adult member is accepted as necessary that person is considered as a beneficiary

with no changes in the calculations. On the other hand, if there is a job-search program signed by that second adult and there is non-compliance behaviour, then changes in the benefit amount do occur. This case is used in the model.

4.2.2 *Income and earnings disregards for benefit recipients and those starting a new job*

Only 80% of labour income after deduction of the contributions to social security is considered for the calculation of the benefit amount.

If the entitled individual or a member of his/her family starts a new job during the receipt of the SII, only 50% of that job income obtained in the first 12 months of work is considered for the calculation of the SII benefit amount after deduction of contributions to social security. In both cases, holiday and Christmas bonus must be considered in terms of SII calculation.

If the entitled individual or a member of his/her family develop occupational activities of social interest in employment programs, 80% of the allowance received are treated as income from work and considered for the calculation of the benefit amount.

4.3 *Tax treatment of benefit and interaction with other benefits*

Not taxable.

4.4 *Benefit duration and waiting periods*

Starting from the July the eligibility to this benefit ceases to be automatic, as a reassessment of eligibility conditions is made during the month of renewal.

4.5 *Treatment of particular group*

4.5.1 *Young persons*

4.5.2 *Older workers*

4.5.3 *Others if applicable*

5. Housing benefits for rented accommodation

Regarding housing benefits, the State supports directly families through three ways: i) the rent subsidy – aimed at the most economical needed households whose housing has been submitted to an extraordinary actualization; ii) the young adults rent incentive; iii) the supported rent regime – social renting of houses built/owned by the State.

In 1985, the DL 46/85 established the possibility of unfreezing the rent actualization, by prescribing a principle of annual actualization of all rents, according to the values determined in an annual legal diploma and allowing the extraordinary correction of the rents frozen before 1980.

The rent subsidy can be divided in three categories: the General Regime, the Special Subsidy for Handicapped Renters (for renters with incapability equal or superior to 60%) and the Special Needs Subsidy (renters receiving one of the fore mentioned subsidies whose economic situation has experienced severe and sudden deterioration in terms of household income, namely due to unemployment or death of family earner).

A special program of Real Estate Investment Funds for Rental Purpose was introduced in 2009 for people with house credit who can't afford the mortgage. Tenants have the option right to re-buy the house, until 31 of December of 2020. Additionally, a temporary support was introduced in 2009 to unemployed people giving them the right to reduce temporarily (maximum of 24 months) the costs of housing mortgage by 50%. At the end individuals must support the whole cost of credit.

5.1 Conditions for receipt

The eligibility is granted to renters who suffered an extraordinary correction of the rent value, as long as the household income and rents respect the limits set in an annually published table.

5.2 Calculation of benefit amount

The calculation framework in the general regime is based on the rent value, the monthly gross income and the household dimension. The model establishes an equivalence between the income of households with different dimensions, calculating a standard reference income according to the average dimension of the families.

The process to compute the subsidy amount is based in the methodology used to determine annually the maximum limit for rent – which corresponds to the maximum of rent that can be subsidized, according to each household dimension – and also in a function that establishes the effort rate for each level of income.

Standard Income

The household standard income is calculated as follows:

Standard income = $[2,40 / f(n)] \times$ monthly gross income

$f(n)$ is the equivalence factor regarding the income of household with different dimensions, according to the table below. The figure 2.4 is the $f(n)$ value which corresponds to the average Portuguese household.

Household dimension (number of individuals)	$f(n)$
1	1

Reference date for all information is July 1st 2010

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

2	1.75
3	2.4
4	3
5	3.575
6	4.11
7	4.62
8	5.12
9	5.625
10	6.1

Maximum rent limit

The maximum rent limit is determined according to the suitability of the house regarding the household dimension, the rent rate and the housing prices by square meter of useful area. These parameters are legally defined.

The limits for 2010 are as follows:

Household dimension (number of individuals)	Rent Limit (Euro)
1	103,86
2	144,26
3	167,34
4	187,53
5	210,62
6	225,04
7	236,58
8	259,66
9	285,63
10	302,94

Base Rent

The base rent is computed by applying a percentage to the gross monthly income of the household, as described by the following formula:

$$p = 10 \times R_p / NMW$$

R_p represents the standard income; p represents the percentage.

5.2.1 Calculation of gross benefit

The benefit is calculated as follows:

a) if the rent is superior to the rent limit:

$$S = 0,5 \times (R_l - R_b)$$

b) if the rent is equal or inferior to the rent limit:

$$S = 0,5[1 + [(R_l - R) / (R_l - R_b)] \times (R - R_b)]$$

R stands for rent; R_l stands for rent limit; R_b stands for base rent and S stands for subsidy.

5.2.2 Income and earnings disregards

The beneficiary loses entitlement whether:

- a) The standard income is superior to three times the NMW;
- b) The base rent is superior to the rent limit;
- c) The rent is inferior to the base rent.

5.2.3 Costs eligible for housing benefits

5.3 Tax treatment of benefit and interaction with other benefits

5.4 Treatment of particular groups

5.4.1 *Young persons*

5.4.2 *Older workers*

5.4.3 *Others if applicable*

6. Family benefits

6.1 Conditions for receipt

Requirements for entitlement: national or foreign, refugees or stateless children resident in Portugal; with no professional occupation; whose household has reference earnings below the maximum income level; and until the following ages:

- 16 years old;
- Or to the maximum of 24 years of age if enrolled in the school, university, professional training or other training periods, or in case of handicapped children receiving social benefits (this limit may be extended for 3 years in case of accident or disease hampering the school performance of the beneficiary);

6.2 Calculation of benefit amount

6.2.1 Calculation of gross benefit

Benefits are paid based on age and income. The rules since October, 2003 are as follows: there are two age groups for dependent children: children aged 12 months or less, and children older than 12 months. There are also 6 levels of income (related to the IAS). The benefit is paid on a monthly basis.

The 'income level' is calculated by adding gross earned income, self-employment income, capital and real estate income, pensions, and any other benefit aiming to replace lost income from work granted by the Solidarity or Insurance Subsystem (including UI, USA, and SII). Any social benefit granted by the Family Protection Subsystem is not considered. This sum is then divided by the number of children in the family, plus one.

Income Level	Reference remunerations related to the IAS
First	$\leq 0,5$ IAS
Second	$> 0,5$ IAS to ≤ 1 IAS
Third	> 1 IAS to $\leq 1,5$ IAS
Fourth	$> 1,5$ IAS to $\leq 2,5$ IAS
Fifth	$> 2,5$ IAS to ≤ 5 IAS
Sixth	> 5 IAS

- Level 1: Families whose reference income is under 50 per cent of 14 times the reference value (i.e. under EUR 2 934.54);
- Level 2: Families whose reference income is over 50 per cent and under 100 per cent of 14 times the reference value (i.e. over EUR 2 934.54 and under EUR 5 869.08);
- Level 3: Families whose reference income is over 100 per cent and under 150 per cent of 14 times the reference value (i.e. over EUR 5 869.08 and under EUR 8 803.62);
- Level 4: Families whose reference income is over 150 per cent and under 250 per cent of 14 times the reference value (i.e. over EUR 8 803.62 and under EUR 14 672.7);
- Level 5: Families whose reference income is over 250 per cent and under 500 per cent of 14 times the reference value (i.e. over EUR 14 672.7 and under EUR 29 345.4);
- Level 6: Families whose reference income is over 500 per cent of 14 times the reference value (i.e. over EUR 29 345.4).

The family allowance is paid on a monthly basis. An additional monthly amount is payable in September to families on the first income level to compensate for the costs of education with the children and young people provided that they are aged between 6 and 16 years and are enrolled in school.

The reference remunerations comprise the sum of all income from each member of the household divided by the number of children of that household that benefit from the family allowance plus 1. The following sources of income are considered:

- Income from work (employee);
- Professional and business income;
- Capital income;
- Land income;
- Pensions;
- Any other social benefits that aim to replace the lost income from work granted by the Solidarity or Insurance Subsystem.

The monthly amounts (Euros) per child in 2010 (until November, see 12.1) were:

Income level	Age ≤ 12 months	Age > 12 months
First	174,72	43,68
Second	144,91	36,23
Third	92,29	26,54
Fourth	56,45	22,59
Fifth	33,88	11,29

Those that are included in the 6th income level are not entitled to the benefit. On November 2010, the fourth and fifth income levels lost entitlement to this benefit. Please see 12.1 for changes implemented in November 2010 on Family Benefits.

6.2.1.1 *Irregular additional payments*

6.2.2 *Income and earnings disregards*

The beneficiaries (children) of the family allowance can't accumulate these allowances with earned income.

6.3 *Tax treatment of benefit and interaction with other benefits*

Not taxable.

6.4 *Treatment of particular groups*

6.4.1 *Young persons*

Children aged between 12 months and 36 months (inclusive) are entitled to double the Family Allowance amount if living in families with 2 children or to triple the Family Allowance amount if living in families with 3 or more children.

Income level	2 children entitled	3 children or more entitled
First	43,68	87,36
Second	36,23	72,46
Third	26,54	53,08
Fourth	22,59	45,18
Fifth	11,29	22,58

6.4.2 *Older workers*

6.4.3 *Others if applicable*

Pregnant women are entitled to pre-natal family benefit from the 13th week onwards.

Income level	Pre-Natal Family Benefit
First	174,72
Second	144,91
Third	92,29
Fourth	56,45
Fifth	33,88

Lone-parent families are entitled to an increase of 20% on the family allowance in the following conditions:

- children and young persons living with only one relative or in-laws in a direct line or collateral line until the second degree or equivalent and
- pregnant women (from the 13th week of pregnancy onwards) entitled to pre-natal family benefit and living alone or living only with children and young persons entitled to family benefit.

The family allowance may be increased in case the child is handicapped.

- Eligibility conditions the children: to be handicapped and less than 24 years old and:
 - Be enrolled or qualify for enrolment in a specialized rehabilitation equipment, or;
 - In need of personalized medical or educational support.

The amount added to the family allowance varies according to the age of the child. These are paid on a monthly basis.

Monthly amounts (in Euros)

	2010
Until 14 years of age	59,48
From 14 until 18 years of age	86,62
From 18 to 24 years of age	115,96

If the handicapped child lives in a Lone-parent family, these amounts are accrued by 20%.

Students under 18 years old enrolled in upper secondary school who benefit from the 1st or 2nd income level of family allowance are also entitled to a scholarship in the amount of two times the value of the family allowance. Starting from January 2011, this scholarship amount is equal to the value of the family allowance.

6.4.4. Parental Leave Scheme

Parents with registered remuneration in the compulsory social insurance scheme are entitled to receive parental leave benefits (Protecção Social na Parentalidade). In specific situations, workers without compulsory social insurance who pay the voluntary social insurance (Seguro Social Voluntário) are also entitled to these benefits (for instance, scientific research fellows).

The parental leave scheme includes the following situations:

- Medical risk during pregnancy
- Pregnancy interruption
- Parenting
- Adoption
- Specific risks
- Child assistance in case of illness or accident
- Disabled or chronically ill child assistance

- Grandchild assistance

Each one of these situations corresponds to one or more benefits as described in the next table:

Parental Leave Scheme Benefits		Daily amount (% of the reference income) ⁽¹⁾ and Duration	
Benefit for medical risk during pregnancy		100% - without limit of time since medically certified	
Benefit for pregnancy interruption		100% from 14 to 30 days	
Parenting or Adoption	Parental benefit or Adoption benefit ⁽²⁾	<i>Parents don't share the leave</i>	<i>Parents share the leave</i>
	i) Initial parental benefit ⁽³⁾	100% in case of 120 days 80% in case of 150 days	100% in case of 150 days (120 + 30) 83% in case of 180 days (150 + 30)
	ii) Initial parental benefit exclusive of the mother	100% - 30 days of optional leave before birth and 6 weeks (42 days) of compulsory leave after birth.	
	iii) Initial parental benefit exclusive of the father	100% - 10 days of compulsory leave (5 immediately after birth plus 5 in the first 30 days) plus 10 day of optional leave.	
	Extended parental benefit or Extended adoption benefit	25% - 3 months for each parent of untransferable leave (maximum 6 months)	
Specific risks benefit		65% - for the time considered necessary during pregnancy and/or breastfeeding if women work at night or are exposed to professional risk(s).	
Child assistance in case of illness or accident benefit		65% - maximum of 30 days/year if the child has less than 2 years or 15 days if the child has more than 12 years	
Disabled or chronically ill child assistance benefit		65% (maximum of 2 times the amount of IAS/month) - 6 months (maximum) with extension possibility until 4 years	
Grandchild assistance benefit			
i) Grandchild birth assistance ⁽⁴⁾		100% - 30 days of leave after the grandchild birth	
ii) Grandchild assistance		65% - remaining days not used by parents under the child assistance benefit (maximum of 30 days/year). If the grandchild suffers from disability or chronicle disease child age limit is not applied.	

Notes: (1) Christmas and holidays allowances included. Minimum amount equals 80% of 1/30 of the IAS.

(2) The same rules applies also to the Initial Parental Benefit in the event of one of the parents being prevented from taking the leave (by death or physical or mental incapacity of one of the parents).

(3) Duration includes exclusive parental leave of the mother and of the father.

(4) Grandchild birth assistance is valid just if grandparent's child has less than 16 years and lives in the same household.

6.4.4.1. Conditions for receipt

Eligibility is granted to employees and self-employed residing in Portugal with at least 6 months (consecutive or not) of compulsory contributory record for the general social security scheme.

6.4.4..2 Calculation of benefit amount

The daily amount of benefits is paid according to the reference income of the beneficiary in the 6 months of registered earnings before the fact (birth), calculated as follows: $R/180$ in which R corresponds to the total amount of income received during the first 6 months of the last 8 months prior to the birth and 180 to the number of available days in 6 months.

However, if the beneficiary does not have 6 months of registered earnings before the fact, the daily amount of benefits are calculated as follows: $R/(30 \times n)$ in which R equals the total amount of income received and n equals the number of months.

The minimum amount of these benefits cannot be less than 80% of 1/30 of the IAS nor it can be less than 40% of 1/30 of the IAS in case of extended parental benefit.

6.4.4.3 Tax treatment of benefit and interaction with other benefits

Not taxable.

During the period of subsidized parental leave and associated benefits a full-time social contribution equivalent is registered for pension entitlement. Beneficiaries do not interrupt their contributory career and the reference earnings are registered as if actual full-time wages were being received.

Parental leave scheme benefits cannot be accumulated with unemployment benefits and other social benefits with the exception of Disability, Old Age and Survivor's Pension, Social Insertion Income and Solidarity Supplement for the Elderly. During the social parental benefit/social adoption benefit the unemployed insurance is suspended until the term of these benefits.

In case of illness those entitled to parental leave, extended parental leave, adoption, disabled or chronically ill child assistance have the right to suspend the benefit.

6.4.5. Social Parental Benefits

Parents without the necessary contributory career are protected by the new social parental protection scheme. The benefit, introduced for the first time in 2008, institutionalizes the right of almost all parents to a means-tested parental protection scheme independently of their working condition.

The social parental benefits include the following situations:

- Social benefit for medical risk during pregnancy

- Social benefit for pregnancy interruption
- Social parental benefit
- Social benefit for adoption
- Social benefit for specific risks

Each one of these situations corresponds to one or more benefits as described in the next table:

Social Parental Benefits	Daily amount (% of 1/30 of the IAS) and Duration	
Social benefit for medical risk during pregnancy	80% as long as necessary since medically certified	
Social benefit for pregnancy interruption	80% from 14 up to 30 days	
Social Parental Benefit or Adoption Benefit ⁽¹⁾	<i>If parents don't share leave</i>	<i>If parents share leave</i>
i) Initial social parental benefit ⁽²⁾	80% in case of 120 days 64% in case of 150 days	80% in case of 150 days (120 + 30) or (120 + 15 + 15) 66% in case of 180 days (150 + 30) or (150 + 15 + 15)
ii) Initial social parental benefit exclusive of the mother	80% during 30 optional days before birth and 6 compulsory weeks, 42 days, after birth.	
iii) Initial social parental benefit exclusive of the father	80% during 10 compulsory days (5 immediately after birth plus 5 in the first 30 days) plus 10 optional days	
Social Specific Risks Benefit	80% as long as necessary during pregnancy or breastfeeding for women who work at night or who are exposed to professional risks.	

Notes: (1) The same rules applies also to the Initial Parental Benefit in the event of one of the parents being prevented from taking the leave

(2) Duration includes exclusive social parental leave of the mother and of the father.

6.4.5.1 Conditions for receipt

Citizens residing in Portugal in a situation of economic hardship (including foreigners, refugees and stateless persons) and who, as a consequence of the absence or inadequacy of their contribution record in the compulsory protection scheme or due to lack of entitlement to the corresponding allowances of the general social security scheme, cannot benefit from the protection assigned to employees and self-employed.

Social Parental Benefits	Less than 80% <i>per capita</i> of the IAS	Unemployed with less than 80% <i>per capita</i> of the IAS
Social benefit for medical risk during pregnancy	x	
Social benefit for pregnancy interruption	x	
Social parental benefit	x	x

Reference date for all information is July 1st 2010

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

Social adoption benefit	x	x
Social specific risks benefit	x	

6.4.5.2 Calculation of benefit amount

Access is means-tested, as defined in relation to monthly per capita income of the household, which may not exceed 80% of the value of the IAS (Social Support Index).

The daily amount of social parental benefit is index-linked to the value of the IAS, corresponding to 80% x 1/30 the value of this index reference (€419,22 in 2010). Social parental benefit is equal to 64% x 1/30 of the value of the IAS in case the beneficiary opted for the 150 days' parental leave. The social benefits for medical risk during the pregnancy, pregnancy interruption and for specific risks correspond to 80% x 1/30 the value of this indexing reference.

6.4.5.3 Tax treatment of benefit and interaction with other benefits

Social benefits are not subject to taxation.

Social benefits cannot be accumulated with unemployment benefits and other social benefits with the exception of Survivor's Pension, Social Insertion Income (formerly minimum guaranteed income) and Solidarity Supplement for Old Persons. During the social parental benefit/social adoption benefit the unemployed insurance is suspended until the term of these benefits.

The duration of these benefits corresponds, in general terms, to that of parental leave scheme paid under the general social security system. (see table above Social Parental Benefits)

7. Childcare for pre-school children

In what concerns children aged 0-2 years old, the fraction of children attending crèches is higher in children with 2 and 1 year old whilst children aged 1 year and less have the higher fraction of children attending childminders.

The coverage rate in childcare (below 3 years old) is 33% per cent (2009).

Percentage of children in childcare by age (2008)

Type of Childcare	<1 years	1 years	2 years	3 years
Creche	12.9	21.0	27.5	2.7
Childminder	0.9	1.7	1.9	0.9

Although Pre-School Institutions are primarily directed to children aged 3 to 5 years old, children aged 2 years old may enrol in September if they complete 3 years until 31 of December. Priority in access is giving to the most aged children.

Percentage of children in Pre-school by age (2007/2008)

	3 years	4 years	5 years	6 years
Pre-school	63.0	81.3	92.0	2.6

Compulsory schooling begins at the age of 6, although children aged 5 years old may enrol in September if they complete 6 years until 31 of December.

7.1 *Out-of-pocket childcare fees paid by parents*

The rules for fees to be paid for using childcare services provided by public or non-profit organizations (the latter also called IPSS) are the following:

The family fee is determined through a percentage over the *per capita* income of the household as shown in the table below:

Services and equipments	Income tiers					
	1st	2nd	3rd	4th	5th	6th
<i>Crèche, childminder and family crèches</i>	15%	22.5%	27.5%	30%	32,5%	35%
<i>ATL (Free-Time Activity Centres – without meals</i>	5%	7%	10%	12.5%	15%	15%
<i>ATL (Free-Time Activity Centres) – with meals</i>	12.5%	15%	17.5%	20%	22.5%	22.5%
<i>Children's Home</i>	40%	45%	50%	50%	55%	75%

The maximum family fee calculated according to these rules cannot be higher than the real average cost (including administration expenses) per user of the service in question. The estimate of the real average cost amounted to around EUR 345 per month in 2009.

Family fees

Reduction of the family fee:

Reference date for all information is July 1st 2010

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

- 20% reduction in case more than one individual from the same household uses the same establishment;
- 25% reduction in the following cases:
 - When meals are not provided by the establishment or if the user doesn't benefit from it;
 - When justified absent periods exceed 15 days non interpolated.

The institutions may reduce, suspend or excuse the payment of the family fee in special cases in which a careful socio-economic analysis of the household condition concludes that the household cannot afford those fees.

The calculation of the per capita income is made according to the following formula:

$R = (RF - D) / N$, being

R = per capita income

RF = gross monthly household income (sum of all household income/12). The Holidays and Christmas subsidies (i.e. the 2 extra monthly wages – each Portuguese worker usually receives 14 wages during a year of work) are not considered as part of the “gross monthly household income” for this purpose.

D = fixed expenses (these include tax, social contributions, house rent or mortgage payment, average monthly cost related to public transportation, medicine expenses when related to chronic illnesses¹)

N = number of individuals of the household

Per capita income tiers as a percentage of the National Minimum Wage (NMW), used for calculation of the family/user fee:

<i>1st tier</i>	Until 30% of NMW
<i>2nd tier</i>	Between 30% and 50% of NMW
<i>3rd tier</i>	Between 50% and 70% of NMW
<i>4th tier</i>	Between 70% and 100% of NMW
<i>5th tier</i>	Between 100% and 150% of NMW
<i>6th tier</i>	Over 150% of NMW

The family fees are generally annually revised and the amounts are legislated.

Childcare fees for crèches and kindergartens are considered as educational/training expenses for tax purposes. As so, 30% of household educational expenses are tax deductible to the limit of 160% of the

¹ These two last expenses (public transport and health) may be subject to a maximum limit, which cannot be less than the NMW.

NMW. In case the household has 3 or more dependents, this limit is increased by an amount correspondent to 30% of the NMW for each dependent, in case all of them have educational/training expenses.

7.2 *Child-care benefits*

There are no cash benefits received by parents for children in childcare. Nevertheless, indirect support is provided as most childcare institutions (Crèches: non-profitable organizations) receive State Support through Cooperation Agreement and in return they must provide priority in access to children of low income families and comply with the above mentioned rules for family fee calculation. Nannies can also benefit from these arrangements.

In 2009 and 2010, the State supported most non-profitable organizations with a monthly amount of €239.85 per child. Nannies are entitled to a State per child monthly support of €179.94 for the 1st and 2nd children and €201.54 for the 3rd and the 4th. If the nanny has solely one child with disability she receives €359.88 monthly and if the nanny has more than one child with at least one child with disability the per child monthly support increases to €403.07. Additionally, nannies and non-profitable crèches supported by the State receive the family fee according to the family socio-economic conditions as referred above. Childcare fees are not taken into account for social assistance.

7.2.1 Conditions for receipt

7.2.2 Calculation of benefit amount

7.2.2.1 Calculation of gross benefit

7.2.2.2 Income and earnings disregards

7.2.3 Tax treatment of benefit and interaction with other benefits

7.2.4 Treatment of particular groups

9.5.1 Young persons

9.5.2 Older workers

9.5.3 Others if applicable

10. Tax system

The tax unit is the family. Family income includes the income of any dependent children. Tax is computed on aggregate net income in the various categories of income, *i.e.* after the deductions specific to each category and standard and non-standard reliefs.

10.1 Income tax

10.1.1 Tax allowances and credits

10.1.1.1 Standard allowances

Standard deduction of 72 per cent of 12 times the highest monthly minimum wage.² If compulsory contributions to social protection schemes and statutory sub-schemes for health care exceed that limit, the deduction will equal the amount of those contributions.

A deduction is provided for the portion of trade union dues not constituting consideration for benefits in the realm of health care, education, assistance for the elderly, housing, insurance or social security, up to 1 per cent of the taxpayer's gross income, increased by 50 per cent. These dues are not taken into account in the calculations underlying this Report.

10.1.1.2 Standard tax credits

Basic credits:

- EUR 261.25 for each unmarried taxpayer or for each spouse;
- EUR 380.00 for a taxpayer in a single-parent family;
- EUR 190.00 for each dependent child; This tax credit is doubled for dependent children whose age does not exceed 3 years old.
- EUR 261.25 for each ascendant whose income does not exceed the minimum pension benefit. When there is only one ascendant, the tax credit is EUR 403.75.

Other tax credits

- Non-reimbursed health care costs, not covered by Social Security: 30 per cent of health care costs plus interest on loans contracted to meet them, without limit if the expenses are exempt from VAT or subject to the reduced rate of VAT; otherwise, up to EUR 64 or 2.5 % of expenses that are exempt from VAT or subject to the reduced rate of VAT plus interest on loans contracted to meet them.

2. The corresponding amount equals EUR 4 104.00 (72 per cent x 12 x EUR 475.00).

- Expenditures for educating the taxpayer or the taxpayer's dependants: 30 per cent of outlays, up to 160 per cent of the highest minimum wage (EUR 760.00). For households having three or more dependants, the limit is raised by 30% of the highest minimum wage (EUR 142.50) for each dependant, if each of them incurs education costs.
- Costs for sanatoria or retirement homes for taxpayers, their ascendants and collaterals up to the third degree whose income does not exceed the national minimum wage: 25 per cent of expenses up to EUR 403.75.
- Costs for the acquisition, construction or improvement of the taxpayers' primary, permanent residence, or for renting out property for a permanent residence: 30 per cent of interest and principal repayments up to EUR 586.00. Rent paid by a tenant, for his permanent residence under an agreement typified by the law, up to EUR 586.00. These limits are increased by 10 per cent if the building is duly certified as 'most efficient' in what concerns energy use (categories A or A+). These limits are also increased by 50 per cent for taxpayers in the first two tax rate brackets, by 20 per cent for taxpayers in the third tax rate bracket and by 10 per cent for taxpayers in the fourth tax rate bracket.
- Acquisition of new infrastructure for the use of renewable energies: 30 per cent of amounts spent, up to EUR 796. This tax credit cannot be combined with tax credits for the costs of acquiring, constructing or improving the taxpayer's primary, permanent residence, or of renting out property to be used as a permanent residence.
- Life and personal accident insurance premiums exclusively covering the risks of death, disability or retirement pensions: 25 per cent of premiums paid in the year in which the corresponding income was received, up to EUR 64 for unmarried taxpayers and EUR 128 for a married couple.
- Health insurance premiums: 25 per cent of premiums paid in the year in which the corresponding income was received, up to EUR 82 for unmarried taxpayers and EUR 168 for a married couple, plus EUR 41 for each dependent child.
- Individual Retirement Savings Plans (PPRs): 20 per cent of amounts invested, for unmarried taxpayers or for each spouse, up to:
 - EUR 400 for taxpayers under 35;
 - EUR 350 for taxpayers over 35 and under 50;
 - EUR 300 for taxpayers over 50.
- Social Security Individual Accounts: 20 per cent of amounts invested, for unmarried taxpayers or for each spouse, up to a limit of EUR 350.
- Donations granted on the conditions stated in the statutes governing charities (grants to central, regional or local government, special "social solidarity institutions", museums, libraries, schools, institutes, educational or research associations, public administrative bodies, etc.): 25 per cent of donations, limited in certain cases to 15 per cent of the donor's tax liability.

10.1.2 *Income tax schedule (central government income tax)*

To determine taxable income, to which the rates listed in the tax schedule are applied, income is divided by 2.

Taxable income	Marginal tax rate (%)	Amount to deduct
----------------	-----------------------	------------------

Reference date for all information is July 1st 2010

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

(EUR) (R)	(T)	(EUR) (K)
Up to 4 793	11.08	---
Over 4 793 up to 7 250	13.58	119.83
Over 7 250 up to 17 979	24.08	881.08
Over 17 979 up to 41 349	34.88	2 822.81
Over 41 349 up to 59 926	37.38	3 856.53
Over 59 926 up to 64 623	40.88	5 953.94
Over 64 623 up to 150 000	42.88	7 246.40
Over 150 000	45.88	11 746.40

In the case of taxpayers whose income stems primarily from dependent employment (earned income), disposable income after application of the tax rates to taxable income may not be less than 120 per cent of the national minimum wage, (EUR 7 980.00 in 2009), nor may it result in income tax of which the taxable base after application of the conjugal quotient is EUR 1 896 or less.

10.1.3 *State and local income taxes*

10.2 *Treatment of family income*

The tax unit is the family and taxes are paid jointly.

10.3 *Social security contributions and payroll taxes*

Social security contributions are totally deductible if they exceed EUR 4 104.00 per taxpayer, in which case the deduction for the contributions replaces the standard earned income deduction.

10.3.1 *Contributions payable by employees and benefit recipients*

As a rule, the rate of employee contributions is 11 per cent of gross pay, with no ceiling.

10.3.2 *Contributions payable by employers*

The employer's rate of social security contributions is 23.75 per cent of gross pay, with no ceiling.

Reference date for all information is July 1st 2010

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

10.3.3 *Payroll taxes*

[This heading covers taxes paid by employers or employees either as a proportion of payroll or as a fixed amount per person, and which do not confer entitlement to social benefits. See Annex for details].

10.4 *Treatment of particular group*

[for income taxes, social contributions and payroll taxes]

10.4.1 *Young persons*

10.4.2 *Older workers*

10.4.3 *Others if applicable*

[e.g. immigrants, self-employed, sick or disabled, pensioners]

11. Part-time work

11.1 *Special benefit rules for part-time work*

The worker may change from full-time to part-time work for a pre-determined period up to a maximum of 3 years also due to the need to accompany the sons, adopted children or stepson that live with her, during the first 12 years of their lives. In this case only, the period of time spent in part-time work will be taken into consideration as if it was full-time work for the calculation of any benefit under the general regime of the public social security system for private workers.

11.2 *Special tax and social security contribution rules for part-time work*

When changing from full-time to part-time the worker is entitled to a temporary reduction in the workers social contribution rate: from the standard 11% to 6%. This temporary reduction will be effective throughout the period of the part-time work until a maximum of 36 months.

12. Policy developments

12.1 *Policy changes introduced: 2nd July 2009 – 1st July 2010*

In the second semester a set of changes on social policy were introduced due to fiscal consolidation needs. Most are referred in the respective points of this country note.

In what concerns the Family Allowance, the 25% special accrual on the benefit amount introduced in 2008 for the first two tiers of household reference income was eliminated. Furthermore, eligibility is now confined to households belonging to the first three tiers of reference income. These changes also apply to the pre-natal family benefit.

In 2008, an additional amount equal to the Family Allowance monthly amount was paid in September to families with children in school age (6-16 years old) belonging to the first tier of household reference income. In 2009, this additional amount was extended to all tiers. In the second semester of 2010 this additional amount resumed its original formula encompassing strictly the households on the first tier.

A set of more strict jobs accepting conditions were implemented: if employment proposals received by UI beneficiaries in the first 12 months ensured a gross return equal or greater than the value of the UI benefit plus 10%, they are obliged to accept it. After that, i.e. after the 13th month, UI beneficiaries must accept employment proposals that ensure a gross return equal to the amount of UI benefit. To prevent fraud and misuse of this UI it is forbidden the accumulation between this benefit and any kind of income received from the company “responsible” for the unemployment situation.

A major change on Portuguese Social Policy has been the implementation of a common legal diploma for almost all means-test benefits in what concerns the calculation of the Household Reference Income. The changes were threefold: the household composition, the income sources considered as household income and the equivalence scale. The new regulation was implemented in August and the changes are detailed below. However, it is important to bear in mind that in light of the new means-test conditions, families receiving Unemployment Assistance and Family Allowance must submit income information until 31st December 2010, while the Social Insertion Income beneficiaries must provide information on the month prior to the annual renewal assessment of the eligibility to this benefit.

Household Composition

According to the present rules, are considered members of a household people living in common economy that share between themselves one of the following links:

- Spouse or partner for over than 2 years;
- Relatives and related kin until the 3rd degree such as, parents, in-laws, stepfather, stepmother, children, stepchildren, stepsister, stepson, grandparents, grandchildren, brothers and sisters, uncles, nephews, great-grandparents, great-grandchildren;
- Relatives and minors related kin (with no limit for the kinship degree)
- Adopted strictly and minors administratively or judicially entrusted to one of the household members;

The sole exception regards children and young adults living in foster homes (Centro de Acolhimento) that are considered as isolated persons and cannot be included as members of the household.

Household Income

The household income calculation results from the sum of all the income sources (gross income, including capital income, real estate income, pensions (including maintenance payments), social benefits (all benefits except family benefits, disability benefits and dependence benefits); fellowships and training grants (except food allowance, transportation and accommodation); rent subsidies or other housing support.

Different benefits have different time frames for assessing the household reference income:

- ✓ *Social Insertion Income*: income on the month prior to the application or the average of the 3 months previous to the requirement in case of self-employed workers or workers with variable wages; only 80% of labour income after deduction of the obligatory contributions to social security is considered; if there is labour income not collectable for social contributions, then this share of income is considered as household income at 100%;
- ✓ *Family Allowance*: earning declared for tax purposes in the previous year;
- ✓ *Unemployment Assistance*: earnings in month prior to the application or the most recent month for which income is known

Social Housing Benefits

In case of household living in social housing, is added to the monthly income of household:

- In the first year receiving the benefit is added the value of €15.45
- In the second year receiving the benefit is added the value of €30.91
- From the third year ahead receiving the benefit added the value of €46.36

Real Estate Income

If the household elements are homeowners, it is considered as property income, the sum of the following values:

- a) Permanent Housing (only if the asset value of permanent housing is more than 600 times the Social Support Index (€251,532): 5% of the difference between the asset value of permanent housing and €251,532;
- b) Other buildings – are considered as income the greatest of following values: the total amount of received rent or 5% of the asset value of all buildings (excluding permanent housing).

Capital Income

If household members have financial assets (such as deposits in bank accounts, stock actions, saving certificates or other financial assets), then it is considered as household income the greatest of the following values: the total amount of capital income received (bank deposit interests, shared dividends or return on other financial assets) or 5% of the total value of the financial assets (credits deposited in bank accounts, stock actions, saving certificates or other financial assets)

If the total value of financial assets of the household members exceeds € 100,612.80 (240 times the value of the IAS) then there is no access to means-tested benefits.

Equivalence Scale

After determining the household composition and household income, the reference income is calculated by dividing the household income by the number of household members using the equivalence scale defined on the following table (OECD original equivalence scale).

Household member	Weight
Claimant	1
Each adult (except for the claimant)	0.7
Each child	0.5

Exceptions

In terms of family benefits (point 6) the calculation the equivalence scale used still refers to the number of children in the household plus one.

12.2 *Future policy changes announced since 1st July 2009*

In the beginning of 2011, all SII entitled individuals and beneficiaries between 18 and 55 years old with work capacity but without a job should have access to measures of recognition and validation of school, work or/and training skills and qualifications (Novas Oportunidades) within six months from the subscription of the Insertion Programme

ANNEX

DEFINITION OF SOCIAL SECURITY CONTRIBUTIONS AND PAYROLL TAXES.

The following text has been adapted from Annex A of the OECD *Revenue Statistics*.

Social security contributions to general government

Classified here are all compulsory payments that confer an entitlement to receive a (contingent) future social benefit. Such payments are usually earmarked to finance social benefits and are often paid to institutions of general government that provide such benefits. However, such earmarking is not part of the definition of social security contributions and is not required for a tax to be classified here. However, conferment of an entitlement is required for a tax to be classified under this heading. So, levies on income or payroll that are earmarked for social security funds but do not confer an entitlement to benefit are excluded from this heading and shown under personal income taxes or taxes on payroll and workforce. Taxes on other bases, such as goods and services, which are earmarked for social security benefits are not shown here [...] because they generally confer no entitlement to social security benefits.

Contributions for the following types of social security benefits would, *inter alia*, be included: unemployment insurance benefits and supplements, accident, injury and sickness benefits, old-age, disability and survivors' pensions, family allowances, reimbursements for medical and hospital expenses or provision of hospital or medical services. Contributions may be levied on both employees and employers.

Social security contributions paid to institutions outside general government

Contributions to social insurance schemes which are not institutions of general government and to other types of insurance schemes, provident funds, pension funds, friendly societies or other saving schemes [are included here if they are compulsory or quasicompulsory (e.g., by virtue of agreement with professional and union organisations)]. Provident funds are arrangements under which the contributions of each employee and of the corresponding employer on his/her behalf are kept in a separate account earning interest and withdrawable under specific circumstances. Pension funds are separately organised schemes negotiated between employees and employers and carry provisions for different contributions and benefits, sometimes more directly tied to salary levels and length of service than under social security schemes.

Payroll taxes

This heading covers taxes paid by employers or employees either as a proportion of payroll or as a fixed amount per person, and which do not confer entitlement to social benefits. Examples of taxes classified here are the United Kingdom national insurance surcharge (introduced in 1977), the Swedish payroll tax (1969-1979), and the Austrian Contribution to the Family Burden Equalisation Fund and Community Tax.
