

THE UNITED STATES 2010

1. Overview of the system

Generally, unemployed persons who meet certain eligibility requirements can receive unemployment insurance for a maximum of 26 weeks. In addition, there are other programs that assist the unemployed and/or individuals who have low incomes. Some programs have specific provisions for low income families. The most important of these programs is the Supplemental Nutrition Assistance Program (SNAP), formerly known as food stamps^[1], and Temporary Assistance for Needy Families (TANF) which are granted to families in need. Responsibility for administration of SNAP is shared, with the Federal government paying for the benefit costs and setting broad rules and the States directly administering the program. Responsibility for TANF belongs to the individual States. An Earned Income Tax Credit is available to poor working families. The tax unit is the individual, but couples have the option to be taxed jointly. Tax and benefit systems vary from State to State. The State of Michigan is used to represent a typical manufacturing region. Michigan TANF and Unemployment Insurance benefits are somewhat above the average for all States.

1.1. Average worker wage (AW¹)

The 2010 AW level is USD 45 688.

2. Unemployment insurance

The US Department of Labor oversees the system, but each State administers its own programme. Eligibility conditions differ from State to State, as do maximum benefit levels. Generally, all States require that UI recipients be able to work and available for work. Most states also require that UI recipients be actively seeking work.

2.1 Conditions for receipt

2.1.1 Employment conditions

To qualify for the minimum weekly benefit amount (WBA), wages must equal 11/2 X the high quarter wages (HQW) in the base period (BP), or in the alternative BP wages must equal 20 times the state AWW and wages in 2 quarters. Minimum wages needed in the BP to qualify must be at least USD 4,307 in Michigan.

¹ AW refers to the Average Wage estimated by the Centre for Tax Policy and Administration (www.oecd.org/ctp). For more information on methodology see Taxing Wages 2007-2008.OECD, 2007, part 5, sections 2 and 3.

Reference date for all information is **July 1st 2010**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

2.1.2 *Contribution conditions*

Employers pay 0.06 to 10.3 percent of the first USD 9,000 for each covered employee in Michigan. Tax rates among employers vary depending on their experience with respect to unemployment.

2.2 *Calculation of benefit amount*

2.2.1 *Calculation of weekly benefit amount (WBA)*

4.1 per cent of high quarter wages during the base period plus USD 6 for each dependent up to 5 dependants in Michigan. The benefit is bound by a minimum WBA of USD 117 (USD 1,638 per year), and a maximum of USD 362 per week (USD 9,412 per year), in Michigan.

2.2.2 *Income and earnings disregards*

The benefit is not means-tested. Income from work less than or equal to gross benefit amount is withdrawn at a rate of 50 cents to the dollar. Earnings above gross benefit amount are subtracted from 1.5 times the gross benefit amount. Individuals earning more than 1.5 times their gross benefit amount are ineligible to receive benefits.

2.3 *Tax treatment of benefit*

Unemployment insurance benefit income is subject to both Federal and State government income tax, but is exempted from social security taxes.

2.4 *Benefit duration*

All workers get regular state UI benefits for up to 26 weeks. If they are still unemployed after those benefits are exhausted, they will generally draw Emergency Unemployment Compensation followed by Extended Benefits.

Duration of benefit in Michigan on 1st July 2010 was 99 weeks.

Michigan's Unemployment Insurance Benefit Weeks

Source	Which States Qualify?	When Michigan Qualified	Funding Source	Maximum Benefit Entitlement*
Basic UI	All states.	Ongoing	State taxes levied on employers	26 weeks
Emergency Unemployment Compensation (EUC)--Tier 1 (June 2008)	All states. This provides additional weeks to all qualified workers who have exhausted regular unemployment compensation.	When enacted	Federal Gov't	20 weeks or 80 percent of the total amount of regular state UI benefits, whichever is less
Emergency	Originally, only states with an	January	Federal	14 weeks or 54

Reference date for all information is **July 1st 2010**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

Unemployment Compensation (EUC)--Tier 2 (June 2008)	Insured Unemployment Rate (IUR) of 4 percent or higher or a Total Unemployment Rate (TUR) of 6 percent or higher. However, the November 2009 legislation made Tier 2 benefits payable in all states.	2009	Gov't	percent of the total amount of regular state UI benefits, whichever is less
Emergency Unemployment Compensation (EUC)--Tier 3 (November 2009)	States with a 13-week IUR of 4 percent or higher or a 3-month seasonally adjusted TUR of 6 percent or higher.	When enacted	Federal Gov't	13 weeks or 50 percent of the total amount of regular state UI benefits, whichever is less
Emergency Unemployment Compensation (EUC)--Tier 4 (November 2009)	States with a 13-week IUR of 6 percent or higher or a 3-month seasonally adjusted TUR of 8.5 percent or higher.	When enacted	Federal Gov't	6 weeks or 24 percent of the total amount of regular state UI benefits, whichever is less
Extended Benefits (EB)	States with a 13-week IUR of 5 percent or higher, and 120 percent above the IUR rate for the corresponding 13-week period in the two previous years, or states with a 3-month seasonally adjusted TUR of 6.5 percent or higher, and 110 percent above the TUR rate for the corresponding 3-months period in either or both of the two preceding calendar years. If a state has a 3-month seasonally adjusted TUR of 8 percent or higher, and 110 percent above the TUR rate for the corresponding 3-months period in either or both of the two preceding calendar years, the state is considered to be in a "high unemployment period".	Most recently, in January 2009.	Generally shared by state and federal gov'ts, but currently funded fully by federal gov't under ARRA until January 2012 with phase-out until June 2012	13 weeks or 50 percent of the total amount of regular state UI benefits, whichever is less During a "high unemployment period" the total amount of EB payable is 20 weeks or 80 percent of the total amount of regular state UI benefits, whichever is less

*Weekly benefit amount is the same as regular state Unemployment Insurance. Weeks of payment are adjusted so that the appropriate entitlement is received.

2.5 Treatment of particular groups

2.5.1 Young persons

None.

2.5.2 Older worker

None.

3. Unemployment assistance

There are no unemployment assistance schemes in the United States.

4. Social assistance

The Supplemental Security Income (SSI) Programme is a means-tested, federally administered income assistance programme which provides monthly cash payments in accordance with uniform, nationwide eligibility requirements to needy aged, blind and disabled persons. Its operation is beyond the scope of this publication.

SNAP is designed primarily to increase the food purchasing power of eligible low-income households to a point where they can buy a nutritionally adequate low-cost diet. This benefit scheme is classified – for the purposes of this publication – as social assistance.

4.1 Conditions for receipt

Households who meet the income tests described below and who meet other requirements (such as sufficiently low assets and immigration rules, for example) are eligible for SNAP benefits. To be entitled to the benefit, households need to pass two income tests (except for households where all members receive TANF, State General Assistance, or SSI, who qualify automatically*):

- Basic (gross) monthly income must not exceed 130 percent of the poverty guidelines.
- Counted (net) monthly income must not exceed 100 percent of the poverty guideline.

The net income guideline for a family of four in 2010 was USD 1838 per month.

* This automatic qualification is referred to as “categorical eligibility”. USDA regulations promulgated in 2001 allowed States to confer categorical eligibility status on households receiving in-kind TANF-funded benefits in addition to cash benefits. By the end of Fiscal Year 2010, 39 States, including Michigan, had adopted broad-based categorical eligibility policies that in effect, eliminated the gross, net, and asset tests to all or most applicants.

4.2 Calculation of benefit amount

4.2.1 Calculation of gross benefit

Basic (gross) monthly income is the cash household income. Earned income before federal, state and local taxes, and social security contributions is counted. The Earned Income Tax Credit (EITC) (see

Reference date for all information is **July 1st 2010**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

Section 8) is not included in basic monthly income. Also excepted is unanticipated, irregular or infrequent income up to USD 30/quarter and income from tax refunds.

Counted (net) monthly income is computed as follows (2010):

- Basic gross monthly income
- TANF
- Virtually all other cash assistance and retirement income
- Standard deduction: USD 141*
- 20 per cent of gross earnings deduction in recognition of taxes and work related expenses
- Court ordered child support payments deduction made to non-household members
- Out-of-pocket medical expenses deduction for elderly (aged 60 or more) or disabled household members in excess of USD 35
- Out-of-pocket dependent-care expenses deduction
- Excess shelter expense (rent and utility expenses) deduction if it exceeds 50 per cent of net counted income so far and with a maximum of USD 459. For calculation purposes, the average shelter expense in Michigan in 2009 was USD 837.

* Beginning in FY 2003 the standard deduction is equal to 8.31 percent of the poverty level which varies by household size. The deduction can be no less than \$134. In FY 2010 households of 3 persons or less had a standard deduction of \$141, 4-person households had a deduction equal to \$153, 5-person households had a deduction equal to \$179 and for 6 or more persons, the standard deduction was equal to \$205.

As low-income families are expected to spend 30 per cent of their net income on food, the maximum benefit amounts are decreased by 30 per cent of counted (net) income.

Maximum Monthly SNAP allotments are linked to family size (see table).

Maximum monthly SNAP allotments for FY 2010 (in USD per month)

Household size (persons)	Maximum allotments	Gross income eligibility limit	Net income eligibility limit
1	200	1174	903
2	367	1579	1215
3	526	1984	1526
4	668	2389	1838
5	793	2794	2150
6	952	3200	2461
7	1052	3206	2773
8	1202	4010	3085

Reference date for all information is **July 1st 2010**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

Each additional person	+150	+406	+312
------------------------	------	------	------

4.2.2 *Income and earnings disregards*

SNAP benefits are not included in the means test of any other benefit.

4.3 ***Tax treatment of benefit***

SNAP benefits are not taxable.

4.4 ***Benefit duration***

Indefinitely, as long as eligibility conditions are fulfilled. SNAP benefits are issued monthly.

4.5 ***Treatment of particular groups***

4.5.1 *Young persons*

Earnings before high school graduation are excluded from household countable income..

4.5.2 *Older persons*

Households with elderly (aged 60 and over) members: several program rules are relaxed for these households: they do not need to meet the basic (gross) income guideline; they may claim an excess shelter expense deduction greater than the maximum for other households; and they may have more countable assets than other households. Other administrative requirements are also relaxed.

Households with disabled members: in 2010 these households had the same program rules as the elderly.

4.5.3 *Unemployed, healthy childless adults*

The strict work requirements and time limits for healthy, childless adults were subject to strict work requirements and time limits on their participation were waived under the American Recovery and Reinvestment Act, from April 1, 2009 through September 30, 2010.

4.5.4 Immigrants
The 2002 Farm Bill restored SNAP eligibility to most legal immigrants provided they meet the income and asset eligibility requirements. All disabled legal immigrants had eligibility restored effective October 1, 2002, and all legal immigrants in the country for at least five years were had their eligibility restored April 1, 2003. Legal immigrant children under age 18 had their eligibility restored on October 1, 2003. Those admitted as refugees, granted asylum, or given a stay of deportation are eligible without a waiting period, as are legal immigrants with a military connection.

Today, the only legal immigrant group who remain ineligible are nondisabled adults who have not yet been in the U.S. for at least five years, were not admitted as a refugee, and do not have a military connection. Unauthorized immigrants are not eligible for SNAP benefits.

5. **Housing benefits for rented accommodation**

Reference date for all information is **July 1st 2010**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

There is no provision in the U.S. for tax-benefits directly to families to support rental payments. This is in contrast to benefits for homeownership, which are supported through a deduction of mortgage interest payments from a person's federal income tax. There is indirect support in the U.S. Tax Code for rental housing that is affordable for lower income families through the Low Income Housing Tax Credit program. This program provides incentives for construction or rehabilitation of affordable rental housing by providing tax credits that reduce the income tax of investors who participate in the program.

Federal support for rental housing is primarily supported through annual appropriations of federal spending that are administered by the U.S. Department of Housing and Urban Development (HUD). HUD administers a wide variety of programs to provide affordable housing. The three major federal rental assistance programs: public housing; project-based section 8; and tenant-based Section 8 vouchers.

5.1

5.1 Conditions for receipt

Housing assistance is not an entitlement. The three primary rental assistance programs provide for tenant eligibility based on income. Eligible income limits are based on a percentage of the local area median income (AMI)— no greater than 80 percent of AMI for both public housing and project-based Section 8 or 50 percent in the case of Section 8 vouchers). In practice, the three rental assistance programs serve tenants with much lower incomes – primarily below 30 percent of AMI. Priorities are usually based on time on the local waiting list, but localities are allowed to establish local preferences (families transitioning to work from welfare, disabilities, seniors, etc. for example).

The U.S. national median income in 2010 was approximately \$64,400 for a family of 4, with 80 percent of the median being \$51,520 and 30 percent being \$19,320. Using this Chapter's example of the State of Michigan, the median income for a family of four was \$62,800 per year, with 80 percent being \$50,250 and 30 percent being \$18,850.

More information on the calculation of local area median income limits can be accessed at: <http://www.huduser.org/portal/datasets/il.html>

Together, the three major rental assistance programs assist approximately 4.3 million households, which is about one-fourth of those who meet the minimum requirements for assistance.

5.2 Calculation of benefit amount

Tenants are required to pay 30 percent of their income for rent. Tenants in the Section 8 voucher program are also allowed to pay more than that amount to access higher priced housing. This tenant rent contribution is reduced by adjustments to the calculation of income, to provide for deductions for child care and health-related expenses.

In the public housing and project-based Section 8 programs, the benefit is the value of the housing provided. In the Section 8 voucher program, the subsidy makes up the difference between the tenant's rent contribution and a locally determined Fair Market Rent. Again, using this Chapter's example of the State of Michigan, the Fair Market Rent for a 2 bedroom apartment in 2010 was \$796 per month.

Reference date for all information is **July 1st 2010**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

More information on calculation of Fair Market Rents can be accessed at: <http://www.huduser.org/portal/datasets/fmr.html>

5.3 Tax treatment of benefits

Housing assistance is not taxable.

5.4 Benefit duration

There is no statutory limit on duration of assistance. Families may lose assistance through fraud, other criminal activity, or failure to comply with lease obligations.

5.5 Treatment of particular groups

Benefits are pro-rated to households with undocumented non-citizens. For example, a household with five members, of whom one is undocumented, would receive 80 per cent of the subsidy otherwise available.

Family benefits

6.1 Conditions for receipt

The Temporary Assistance for Needy Families (TANF) program (enacted in 1996) replaced the Aid to Families with Dependent Children (AFDC) program and the Job Opportunities and Basic Skills Training (JOBS) program ending the Federal entitlement to assistance. States, Territories, and Indian Tribes (henceforth referred to as States) determine eligibility and benefit levels and services provided to needy families. Although States may impose various conditions on the receipt of assistance, a family must, based on Federal law, include at least one child or the mother must be pregnant.

6.2 Calculation of benefit amount

There are no Federal TANF rules or requirements regarding the State's calculation of benefits. Each State may establish its own benefit levels and determine its own benefit calculation. TANF is the successor to the AFDC program, which was started as a benefit for the children of widows and orphans. Over time, most of the beneficiary families were headed by unmarried mothers. When AFDC began, the benefit enabled mothers without a spouse to support them to care for their children at home. Now, recipients of TANF are expected to work and become self-sufficient within a State-imposed time-limited period for which benefits are available, but generally no longer than 60 months.

The benefit is calculated based on the number of family members using the following amounts as a guideline in 2009 (Michigan):

- 1 person: USD 306 (*i.e.* pregnant mother expecting first child)
- 2 people: USD 403

Reference date for all information is **July 1st 2010**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

- 3 people: USD 492
- 4 people: USD 597
- 5 people: USD 694
- 6 people: USD 828
- 7 people: USD 905

6.2.2 *Income and earnings disregards*

Except where another Federal statute specifies that certain income or other benefits should be disregarded, each State may decide which income to consider in calculating the benefit amount. There is considerable variation among the States in their treatment of earned income. In calculating the monthly benefit, Michigan disregards the first USD 200 of income earned plus 20 per cent of any additional earnings; across all states, the fixed income disregard ranges from zero to USD 1,020 and the variable disregard from zero to 100 per cent up to the limit. In general, states with high fixed disregards tend to have smaller variable disregards and vice versa. Some states (not Michigan) impose a "family cap" on benefits. The initial benefit is based on the size of the family at the time of application, and benefits do not increase for additional children conceived after eligibility is determined.

6.3 *Tax treatment of benefit*

Family benefits are not taxable.

6.4 *Benefit duration*

Eligibility and benefits are determined monthly. Federal funding for a family with an adult receiving TANF assistance is limited to 60 months. The 60 months do not have to be consecutive, but it is a lifetime limit. Each State has the option of shortening the time limit. States may use their own funds to provide benefits after the expiration of the 60 months. Many States have either shortened the time limit (for example, several States have a 24 month time limit) or limited the number of months that a family may receive benefits within a certain period of time. For example, the family may receive benefits for 24 months within a 60-month period, but there is a lifetime limit of 60 months of federally-funded assistance with up to 20 percent of the caseload exempted from the Federal time limit due to hardship.

6.5 *Treatment of particular groups*

Federally recognised Indian Tribes now have the opportunity to administer their own TANF program in a manner similar to States. States have the flexibility to give special treatment to the victims of domestic violence. States have the option to certify that they will assist victims of domestic violence by: screening for them when they apply for TANF; referring these clients to counselling and supportive services; and waiving time limits, residency requirements, child support co-operation requirements, and family cap provisions.

7. Childcare for pre-school children

According to the Federal Interagency Forum on Child and Family Statistics, 61 percent of children from birth through age six (and not yet in kindergarten) are in some type of non-parental child care.²

Primary childcare arrangements among these children vary by age-group as follows:

Type of Care by Age of Child	Parental Care Only	Total in Non-Parental Care	Care in Home by a Relative	Care in Home by a Non-Relative	Centre-Based Care
Ages 0-2	49%	51%	22%	16%	20%
Ages 3-6 (Not in Kindergarten)	24%	74%	23%	12%	57%

Note: Centre-based programs include day care centres, pre-kindergartens, nursery schools, Head Start programs, and other early childhood education programs.

Source: Forum on Child and Family Statistics, “America’s Children in Brief: Key National Indicators of Well-Being, 2010. <http://childstats.gov/americaschildren/tables.asp>, Table FAM3.B, “Child care: Percentage of children ages 0–6 not yet in kindergarten by type of care arrangement and child and family characteristics, 1995, 2001, and 2005.” Data source: U.S. Department of Education, National Center for Education Statistics, National Household Education Surveys Program.

7.1 Out-of-pocket childcare fees paid by parents

Fees paid by parents for full-time, formal centre-based care vary substantially. Some families may pay 100 percent of costs, while others may have fully or partially subsidized care. According to the National Center for Education Statistics, the mean weekly out-of-pocket expenses for non-parental care arrangements for children under age 5, and not yet in kindergarten, were USD 60/week for relative care, USD 105/week for non-relative care, and USD 86/week for centre-based care in 2005.³ Families below 100 percent of the federal poverty line with children under the age of 5 had mean weekly out-of-pocket expenses for child care of USD 38/week for relative care, USD 56/week for non-relative care, and USD 54/week for centre-based care. (Note: These estimates indicate per child expenses. For children with more than one care arrangement, only expenses within that given type of care are summed to calculate the total spent per week.)

Child care services are primarily provided through a market-based system at rates determined by market forces. Rates vary substantially based on region, state, age of child, and type of child care setting. In 2009, the average annual cost of full-time, centre-based child care in Michigan was USD 8 900 for infants and USD 7 350 for a 4-year old.⁴

Child care fees are tax deductible through the Child and Dependant Care Tax Credit (see Calculation of Benefit Amount section below). The tax credit is non-refundable, so families that do not pay taxes do not benefit from the credit. With respect to expenses for dependent care, a household is entitled to a

² Schooling is compulsory, varying from state to state, at age 5 or 6.

³ 2005 National Household Education Survey (NHES), <http://nces.ed.gov/pubs2006/2006075.pdf>.

⁴2011. “2011 Child Care in the State of Michigan. <http://www.naccrra.org/publications/naccrra-publications/publications/Michigan%20-%20ChildCareInAmericaFacts.pdf>

deduction for the actual cost of the care of a dependent if the care enables a household member to accept or continue employment, or training or education that is preparatory for employment.

7.2 *Child-care benefits*

The Child Care and Development Fund (CCDF) is the government child care subsidy program, which provides subsidies to low-income working families to offset the cost of purchasing child care, while maintaining the parental choice afforded by the market system. CCDF is a federal block grant program, providing funds directly to states, territories and tribes to operate a child care subsidy program designed to meet local needs. States have broad flexibility in determining eligibility guidelines (up to a maximum of 85% of state median income), reimbursement rates, & co-payment amounts, as well as the scope and quality of services.

Under CCDF, approximately 90% of subsidised child care services are available to eligible parents through certificates or vouchers, but 21 states also have contracted programs to purchase child care slots.⁵ (Note that under certificates, as well as contracted programs, the actual payment is generally due to the provider; only a small percentage of children – 3 percent in fiscal year 2008– receive services through cash paid directly to parents). Parents may select any child care provider that satisfies applicable state and local requirements – including child care centres, family members, neighbours, family child care programs, after-school programs, and faith-based programs. Child care providers funded by CCDF must meet basic health and safety requirements set by states and tribes. These requirements must address prevention and control of infectious diseases, including immunizations, building and physical premises safety, and minimum health and safety training.

In 2008, nearly USD 5 billion was appropriated to CCDF, and approximately 1.6 million children per month were served.⁶ The American Recovery and Reinvestment Act (The Recovery Act of 2009) contained a special, one-time USD 2 billion increase, for a total of USD 7 billion for FY 2009, to make child care services available to more low-income families and to promote high quality care for all children. A number of states used the Recovery Act funds to serve children by expanding eligibility during periods of job search, reducing family co-payments, or increasing provider payment rates. States have also responded to the national call for improved child care quality by creating or expanding Quality Rating and Improvement Systems (QRIS), improving teacher and professional development systems, developing information technology to improve services, and by making other investments that would increase or improve child care quality for all children, regardless of CCDF eligibility. QRIS are designed to improve quality for children in child care and other early childhood education programs through assignment of ratings, assisting programs in the development and implementation of improvement plans, and helping the public use this information to make decisions about child care.

Additionally, there are two block grant programs that provide child care funding: Temporary Assistance for Needy Families (TANF) and the Social Services Block Grant (SSBG). TANF is a cash assistance program, and states may transfer up to 30 percent of their TANF block grant to CCDF or spend TANF funds directly on child care. The SSBG program provides funding to states for many social services including child care. In FY 2008 approximately USD 12 billion of federal and related state funds were available for CCDF, TANF, and SSBG child care. Through CCDF, TANF and SSBG-funding streams, an

⁵ 2010-2011 CCDF State and Territory Plans, <http://nccic.acf.hhs.gov/pubs/stateplan2010-11/chapter-2.pdf>.

⁶ 2008. “Average Monthly Adjusted Number of Families and Children Served.” Office of Child Care, Administration for Children and Families, Department of Health and Human Services. http://www.acf.hhs.gov/programs/ccb/data/ccdf_data/08acf800/list.htm

estimated 2.5 million children were served on an average monthly basis in 2008 (the most recent year for which data are available).

The Federal government also provides funding for early childhood education through the Head Start program. The Head Start program gives grants to local public and private non-profit and for-profit agencies to promote school readiness by enhancing the social and cognitive development of children through the provision of educational, health, nutritional, social and other services to economically disadvantaged children and families. In fiscal year 2010, the Federal government provided USD 7.2 billion to the program. The program served 904,153 children in fiscal year 2009.⁷ The 2009 Recovery Act also provided USD 1 billion for Head Start and USD 1.1 billion for Early Head Start programs, expanding enrolment for 64,000 children and families, a large increase for Early Head Start.

State-funded pre-kindergarten, or pre-K, programs are another key investment in early childhood education. In 2008-2009, 38 States funded pre-K programs for at least some of their preschool-aged children.⁸ State spending for pre-K programs exceeded USD 5 billion in fiscal year 2008-2009 and served over 1.2 million children. The national average of per-child spending was USD 4 711 when combined with state, local, and locally allocated federal funds. Most of these programs provide at least part-day services for a subgroup of preschool children, usually those from low-income families or with other risk factors.

There are sustained efforts to ensure collaboration between the Head Start, Child Care, and Pre-k programs. For example, the Head Start Reauthorization Act of 2007 requires each state governor to designate an Early Childhood Advisory Council (ECAC) to develop a coordinated system of early childhood education and care. In 2009, the Recovery Act provided USD 100 million to support these state Councils.

Another major source of support for child care services is the Child and Dependent Care Credit, which provides tax assistance to families who pay for child care in order to work in paid employment. In 2008, USD 3.5 billion in assistance was provided under the Child and Dependent Care Tax Credit to 6.6 million taxpayers.⁹ About half of the states offer child and dependant care tax credits or deductions to families in addition to the federal tax credit; eligibility limits and benefit levels vary widely.

7.2.1 *Conditions for receipt*

Federal law provides each state with broad discretion in determining how its CCDF child care programs will operate, such as setting eligibility guidelines, reimbursement rates, and co-payments. Federal law limits the maximum level for eligibility to 85 percent of state median income and requires states to give priority to very low income families. Parents must be working, (or seeking employment), or attending job training or education, or the child must be in need of protective services. Typically a child must be under age 13, however, children with special needs may be eligible up to 19 years of age. Eligibility limits set by states range from 37 percent of state median income (SMI) to 83 percent of SMI in 2010.¹⁰ On average in fiscal year 2010, the income eligibility level was 60 percent of SMI. Michigan set

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

the level of eligibility in Fiscal Year 2010 at 38 percent of the State median income, regardless of family size, and does not maintain a waiting list.¹¹

7.2.2 *Calculation of benefit amount*

CCDF and TANF child care benefits amounts are set by the state and typically vary by type of provider and other factors. Families receiving CCDF subsidies are required to contribute to the price of care on a sliding scale (based at a minimum on family size and income), although states may waive co-payments for families at or below poverty. According to administrative data for fiscal year 2008 the weighted average monthly CCDF subsidy among the 50 States and District of Columbia was USD 609 per family; family co-payments averaged USD 79 per month.¹² (The weight is in proportion to the number of families/children served by CCDF in each State). These amounts include care for children of all ages, full and part-time care, and care by relatives as well as family day care homes and child care centres. Among children receiving a CCDF subsidy in fiscal year 2008, 61 percent were in centre-based care. For families under 100 per cent of the federal poverty line, the monthly average co-payment was USD 35 across all types of care. For families over 100 percent of poverty but below 150 percent of poverty, the average was USD 102; and for families over 150 percent of poverty, the average was USD 168.

Michigan's child care subsidises are based on a sliding scale related to gross monthly income and family size. The ceiling income for subsidy eligibility ranges from USD 1 607 for family of 2 to USD 2 367 for family of 4. Co-payments range from 5 percent to 30 percent of Michigan's child care reimbursement rate ceiling. Reimbursement rate ceilings vary by age of child, type of care, and by locality. For centre-based care, the rate ceiling is USD 2.98 per hour for infants, USD 2.98 per hour for toddlers, and USD 2.33 per hour for older children. For example, for a toddler in centre-based care for 40 hours/week, the weekly subsidy is USD 119.20, and the weekly co-payment fee would range from USD 5.96 to USD 35.76, depending on family income. Michigan waives co-payment fees for some families at or below the poverty level, specifically for families receiving TANF cash assistance and for families with children receiving protective services.

The Child and Dependent Care Credit provides tax assistance to families who pay for child care in order to work in paid employment or look for work. The amount of credit is based on income, the number of dependents, and the amount of child care expenses. Families with adjusted gross income of less than or equal to USD 15 000 are eligible to receive a child care credit of 35 percent of qualifying child care expenses. Families with higher income receive a lower credit, with the rate falling to 20 percent for individuals and couples with adjusted gross incomes above USD 43 000. In 2008, qualifying child care expenses were capped at USD 3 000 for one child and USD 6 000 for two or more children. Thus the maximum value of the credit was USD 1 050 for an individual or couple with one child and adjusted gross income below USD 15 000 and USD 2 100 for a low-income family with two or more children. The credit is not refundable and so families that do not pay taxes do not benefit from the credit.

7.2.3 *Calculation of gross benefit*

See above.

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

7.2.4 *Income and earnings disregards*

Twenty-four states disregard Supplemental Security Income (SSI), 15 states disregard TANF cash assistance income, 28 states disregard energy assistance or the value of housing allotments, and approximately 22 states disregard Federal and state earned income tax credits when calculating the child care subsidy benefit.

7.3 *Tax treatment of benefit and interaction with other benefits*

No states are known to treat CCDF or TANF assistance as taxable.

7.4 *Treatment of particular groups*

States decide whether to target certain populations for CCDF subsidies. As reported in State Plans for fiscal years 2010-2011, 34 states guarantee child care subsidy eligibility for families receiving TANF cash assistance and 23 states do the same for families transitioning off of TANF.¹³ Priority status is given to families either on or transitioning off of TANF in 16 states. All states are required to give priority to families of children with special needs and families with very low incomes. Examples of other populations that are given special priority by one or more states include families with medical emergencies, parents who are students in post-secondary education, parents in homeless or spousal-abuse shelters, children in protective services or in foster care, and children in need of before and after-school care.

8. Employment-conditional benefits

The Earned Income Tax Credit (EITC) is a refundable tax credit. Eligible for EITC are working families with children under 19 (or under 24 if full-time student, or any age if permanently or totally disabled) and childless working persons aged between 25 and 65 that meet certain income thresholds. (See section 10.1.1.)

9. Lone-parent benefits

None.

10. Tax system

10.1 Income tax schedule

10.1.1 Tax allowances and credits

- *Basic reliefs:* In 2010 a married couple filing a joint tax return is entitled to a standard deduction of USD 11 400. The standard deduction is USD 8 400/350 for heads of households and USD 5 700 for single individuals. This relief is indexed for inflation. More liberal standard deductions are available for taxpayers who are age 65 or older and taxpayers who are blind. Special rules apply to children who have sufficient income to pay tax and are also claimed as dependents by their parents.

¹³ 2010-2011 CCDF State and Territory Plans.

In addition to the standard deduction, in 2010 a USD 3 650 *personal exemption* is given every taxpayer (including both husband and wife filing a joint return). The personal exemption is indexed annually for inflation. In 2010, there is no phase out for personal exemptions. *Standard marital status reliefs*: Married couples generally benefit from a more favourable schedule of tax rates for joint returns of spouses (see Section 1.13). There are no other general tax reliefs for marriage.

-
- *Relief for children*: For each child and other person claimed as a dependent on a taxpayer's return, the taxpayer is entitled to a dependency exemption of USD 3 650 in 2010. Low income workers with dependants are allowed a refundable (non-wastable) earned income credit. For taxpayers with one child, the credit is 34 per cent of up to USD 8 970 of earned income in 2010. The credit phases down when income exceeds USD 16 450 (21 460 for married taxpayers) and phases out when it reaches USD 35 535 (40 545 for married taxpayers). The earned income threshold and the phase-out threshold are indexed for inflation. For taxpayers with two children, the credit is 40 per cent of up to USD 12 590 of earned income in 2010. The credit phases down when income exceeds USD 16 450 (21 460 for married taxpayers) and phases out when it reaches USD 40 363 (45 373 for married taxpayers). For 2010, an increase in the earned income tax credit is available for taxpayers with three or more children. The credit is 45 percent of up to USD 12 590 of earned income. The credit phases down when income exceeds USD 16 450 (21 460 for married taxpayers) and phases out when it reaches USD 43 352 (48 362 for married taxpayers).

Since 1998, taxpayers are permitted a tax credit for each qualifying child under the age of 17. In 2010 the maximum credit is USD 1 000. The maximum credit is reduced for taxpayers with income in excess of certain thresholds. The credit is reduced by USD 50 for each USD 1 000 of income in excess of USD 110 000 for married taxpayers (USD 75 000 for single and head of household taxpayers). These threshold amounts are not indexed for inflation. The child credit is refundable (non-wasteable) to the extent of 15 per cent of earned income in excess of USD 3000. A taxpayer with three or more qualifying children may be allowed a supplemental refundable (non-wasteable) child credit, subject to certain restrictions. The refundable credit is the excess of the taxpayer's share of social security (including Medicare) taxes over his earned income tax credit for the year not used to offset income tax liability.

-
- *Relief for low income workers without children*: In 1994 and thereafter, low income workers without children are eligible for the earned income credit. In 2010 low income workers without children are permitted a non-wastable earned income credit of 7.65 per cent of up to USD 5 980 of earned income. The credit phases down when income exceeds USD 7 480 (12 490 for married taxpayers) and phases out when income reaches USD 13 460 (18 470 for married taxpayers). This credit is available for taxpayers at least 25 years old and under 65 years old.
- *Relief for workers*. The making work pay credit is a non-wasteable tax credit based on earned income. The credit is 6.2 percent of earned income, up to a maximum credit of USD 400 (800 for married taxpayers). The credit is reduced by 2 percent of gross income in excess of USD 75 000 (150 000 for married taxpayers). This credit is available in 2009 and 2010.
- *Relief for social security and other taxes*. There is no special relief for social security taxes although the non-wastable making work pay tax credit and the earned income credits described

Reference date for all information is **July 1st 2010**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

above are sometimes considered an offset to social security contributions made by eligible employees. Furthermore, only a portion of social security benefits are subject to tax.

10.1.2 *The definition of taxable income*

Gross income minus the above tax exemptions.

10.1.3 *The tax schedule*

Table 1. Federal Income Tax ratesTaxable Income Bracket (USD) ¹			Marginal Tax Rate (%)
Single Individual	Joint Return of Married Couple	Head of Household	
0 to 8 3575	0 to 16 750	0 to 11 950	10
8 375 to 34 000	16 750 to 68 000	11 950 to 45 550	15
34 000 to 82 400	68 000 to 137 300	45 550 to 117 650	25
82 400 to 171 850	137 300 to 209 250	117 650 to 190 550	28
171 850 to 373 650	209 205 to 373 650	190 550 to 373 650	33
373 650 and over	373 650 and over	373 650 and over	35

1. The taxable income brackets are indexed for inflation.

State and local income taxes

The District of Columbia and 43 of the 50 States impose some form of individual income tax. In addition, some local governments (cities and counties) impose an individual income tax, although this is not generally the case. State individual income tax structures are usually related to the federal tax structure by the use of similar definitions of taxable income, with some appropriate adjustments. This linkage is not a legal requirement but a practical convention that functions for the convenience of the taxpayer who must fill out both federal and State income tax returns.

The AW calculations assume that the average worker lives in Detroit, Michigan. The state of Michigan permits a personal exemption of USD 3 300500 for the taxpayer, the taxpayer's spouse and each child, an additional USD 600 exemption for each child 18 years old and younger, and taxes income at the rate of 4.35 per cent. The city of Detroit permits a personal exemption of USD 600 and taxes income at the rate of 2.5 per cent. Michigan provides a credit for city taxes paid. If the city income tax paid is USD 100 or less, the credit is 20 per cent of the city income tax paid. If the city income tax paid is over USD 100 but not over USD 150, the credit is 10 per cent of the excess of the city income tax paid over USD 100 plus USD 20. If the city income tax paid is over USD 150, the credit is 5 per cent of the excess of the city income tax paid over USD 150 plus USD 25.

10.2 *Treatment of family income*

Families are generally taxed in one of three ways:

- As married couples filing jointly on the combined income of both spouses;
- As married individuals filing separately and reporting actual income of each spouse; or
- As heads of households (only unmarried or separated individuals with dependents).

Reference date for all information is **July 1st 2010**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

All others, including dependent children with sufficient income, file as single individuals.

10.3 Social security contribution schedule

10.3.1 Employees' contributions

Pensions

The rate for employee contributions is 7.65 per cent (6.2 per cent for old age, survivors, and disability insurance, and 1.45 per cent for old age hospital insurance). The 6.2 per cent rate applies to earnings up to USD 106 800. Beginning in 1994, there is no limit on the amount of earnings subject to the 1.45 per cent rate.

There is no distinction by marital status or sex.

10.3.2 Employers' contributions

Pensions

Employers match the employees' tax of 6.2 per cent on earnings up to USD 106 800 and 1.45 per cent of all earnings (without limit).

Unemployment

Employers are required by the federal government to pay unemployment tax of 6.2 per cent on earnings up to USD 7 000. Taxes are also paid to various state-sponsored unemployment plans which may generally be credited against the required federal percentage. In 2007 the average unemployment insurance tax rate in Michigan was 4.9 percent of the first USD 9 000 of wages. The model considers that the Federal government allows employers to take a credit for state unemployment taxes of up to 5.4 per cent, resulting in a net Federal tax of 0.8 per cent on earnings up to USD 7 000.

11. Part-time work

11.1 Special benefit rules for part-time work

The unemployment benefit is calculated for qualifying part-time workers the same as it is for full-time workers.

11.2 Special tax and social security contribution rules for part-time work

Part-time workers only qualify for unemployment insurance if they work more than 20 hours per week or earn more than USD 1 340 per year. There are no specific rules for part-time workers to be eligible to the Earned Income Tax Credit (section 8).

Reference date for all information is **July 1st 2010**

Country chapter for OECD series *Benefits and Wages* (www.oecd.org/els/social/workincentives)

12. Policy developments

12.1 Policy changes introduced: 2nd July 2009 – 1st July 2010

The Working Families Tax Relief Reconciliation Act of 2004 extends marriage penalty relief, an expanded 10 percent rate bracket, and an increased child tax credit for tax years 2005 through 2009.

A new making work pay tax credit is provided. The income at which the earned income tax credit begins to phase out increased for married taxpayers and an enhanced credit is provided for taxpayers with three or more children. The minimum earned income for the additional child credit was reduced so that more families are eligible.

For 2009 and 2010, an increase in the earned income tax credit is available for taxpayers with three or more children.

The phase out for personal exemptions and the limitations on itemized deductions for high income taxpayers do not apply in 2010.

12.2 Future policy changes announced since 1st July 2009

There were no explicit legislative or regulatory changes to the SNAP program for FY 2010. Ten States, plus the District of Columbia, adopted Broad-based Categorical Eligibility policies, and one State expanded its Broad-based Categorical Eligibility policy to include households without children.

The American Recovery and Reinvestment Act of 2009 (P.L. 111- 5) became law February 17, 2009. Below is a summary of the law's provisions that affected child care and

Division A, Title VIII. The Act provided an additional \$2 billion to states, territories, and tribes for child care assistance to low-income working families; specific amounts are reserved for quality improvement activities. In addition, the Act provided \$1.1 billion specifically for Early Head Start expansion for programs that serve infants and toddlers, and \$1 billion for Head Start programs serving pre-school children.
